

More Trains, More Services

Sydney Terminal Area Reconfiguration Project - Erskineville

What happened in February?

During February, we carried out installation of culverts and drainage, reinforcement of electrical and signal footings, installed overhead wiring masts, signal upgrades, and continued with delivery of oversized materials.

What's planned next?

Next month, we will carry out the following activities:

- signalling work
- electrical work including new overhead wiring structures
- drainage work on track.

When will construction occur?

Construction will primarily take place during standard construction hours from 7am to 6pm Monday to Friday, and 8am to 1pm on Saturdays.

Are there activities planned outside of standard hours?

Some work will be undertaken outside of standard construction hours. This work is taking place during a scheduled trackwork period when no trains will be running. This enables the construction team to safely carry out essential activities inside the rail corridor. The work will occur from:

- 10pm, Friday 5 to 2am, Monday 8 March

We will be directly contacting residents who may be impacted by the work scheduled during this weekend.

This work is dependent on weather and site conditions and is subject to change.

Where will work take place?

The above map shows the project area inside the rail corridor in Eveleigh including both site compounds. The site access points are on Swanson Street and Railway Parade.

How do we consider the community?

The project team understands construction activities may cause disruption for the community and we thank you for your patience as we carry out this work. We will adhere to strict environmental conditions relating to noise, vibration and dust management.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

Will alternative transport services be running during scheduled track work weekends?

For up to date information about replacement services during this scheduled trackwork period please visit transportnsw.info or call 131 500.
