

More Trains, More Services

Sydney Terminal Area Reconfiguration Project – Erskineville

Transport for NSW | September and October 2022

What are we doing?

We are upgrading the rail infrastructure between Sydney Terminal and Erskineville Junction to simplify and modernise the rail network so that customers can expect more frequent train services in the future.

What’s been happening?

Due to external factors outside our control, several planned work activities have not been able to go ahead in recent months. We hope to recommence work in September as outlined below.

What’s planned next?

The project team will carry out track work inside the rail corridor to remove a redundant track crossover, a piece of rail infrastructure that allows trains to change tracks, and replace it with straight tracks. This work is expected to generate noise on **Saturday 17 September and Sunday 18 September**, and we will be in contact with impacted residents.

We will also undertake overhead wiring, electrical and signalling work inside the rail corridor in September and install a temporary timber barrier.

Deliveries

You may notice deliveries of materials and equipment to our compounds near Macdonaldtown Stabling Yard and off Railway Parade as shown overleaf. The majority of deliveries will be scheduled during the day, however some deliveries will be required at night during scheduled trackwork periods.

When will work take place?

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays**. Some work and deliveries will also be required outside of standard construction hours including:

- **From 10pm Friday 16 September to 2am Monday 19 September**
- **From 10pm Friday 23 September to 2am Monday 26 September**
- **From 10pm Friday 28 October to 2am Monday 31 October**

The work will take place during scheduled Sydney Trains trackwork periods when no trains will be running. This enables our project team to complete essential work safely.

Where will work take place?

The above map shows the work area inside the rail corridor. The site access points are on Railway Parade, Erskineville Road and Burren Street.

The project team will utilise the site compounds for deliveries, storage of materials and equipment, offices, pre-start work meetings and worker parking.

Changes to planned work

There is a possibility that the upcoming work may be again postponed due to external factors outside our control. To register for digital project updates, including changes to planned work, please email projects@transport.nsw.gov.au with 'Progress updates – MTMS Erskineville' as the subject line and include your name and address.

How do we consider the community?

The project team understands construction activities may cause disruption for the community. We seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

There's a lot happening

Currently there are multiple project teams, transport agencies and contractors working within the Erskineville rail corridor. For more information on work being completed by Sydney Trains, please phone **1300 656 999** or visit www.transport.nsw.gov.au/sydtraincommunity
