

More Trains, More Services

Sydney Terminal Area Reconfiguration Project Drainage upgrade work at Eveleigh

Transport for NSW | November 2022 to January 2023

What are we doing?

We're upgrading the rail infrastructure between Sydney Terminal and Erskineville Junction to support the introduction of the new fleet of trains operating on the South Coast Line. This includes upgrading the drainage system within the rail corridor at Eveleigh to prevent future flooding and improve reliability across the network.

What's been happening?

In September the project team finished building a small retaining wall located near the Paint Shop that will divert excessive rainwater from flowing into the rail corridor.

We also planned to install new drainage pipes inside the rail corridor. Unfortunately this work was postponed due to external factors outside our control. We will notify the community once this work can be rescheduled.

What's planned next?

From **Monday 7 November 2022** we will start work to construct a new pump station inside the carpark at the Eveleigh Maintenance Centre (EMC). This work is expected to take approximately **three months** to complete and will involve some out-of-hours work and deliveries. This pump station will assist in pumping excess water away from the rail corridor.

In **December 2022 and January 2023**, the project team will also return to the work area near the Paint Shop to install new drainage barriers during standard construction hours.

The work locations are shown on the map overleaf.

When will work take place?

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays**.

Some work will take place outside of these hours at EMC and on Locomotive Street in Eveleigh from **6pm to 7am on Tuesday 22 November and Wednesday 23 November**.

Deliveries

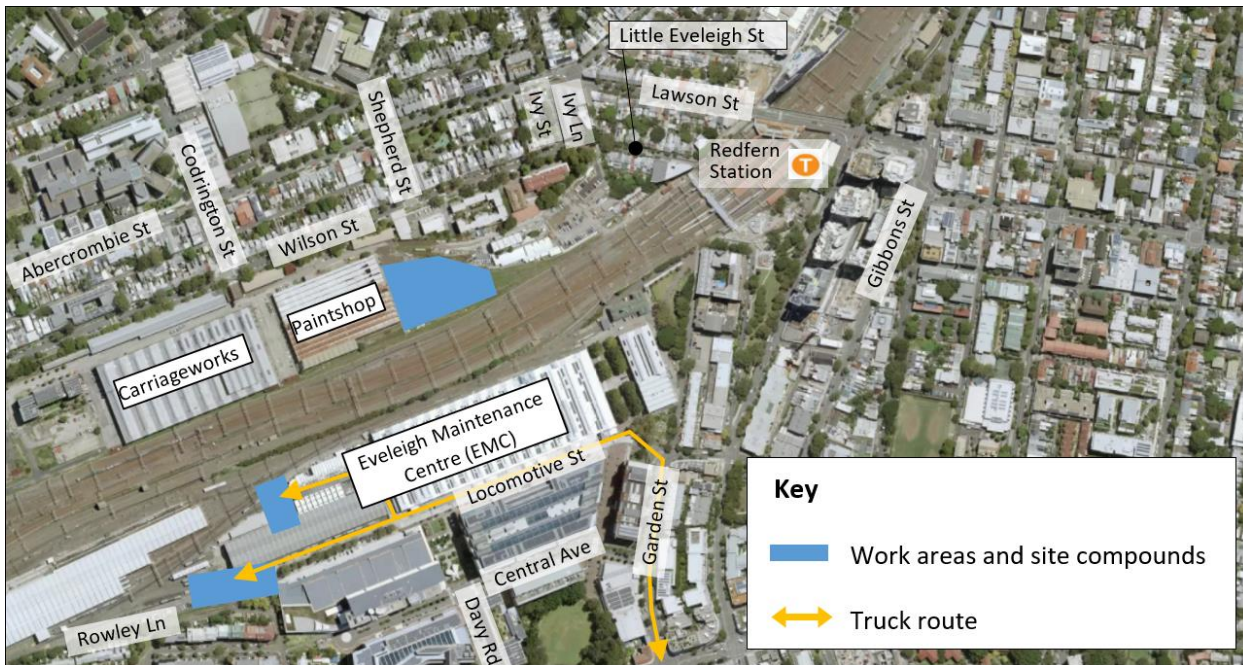

In connection with the upcoming work there will be deliveries of equipment and materials. The site access points are at the intersection of Ivy Lane and Little Eveleigh Street in Redfern, and on Locomotive Street in Eveleigh.

Some oversized deliveries for the new pump station at EMC, including precast concrete segments and a valve chamber, will take place on Locomotive Street outside of standard construction hours from:

- **3am to 12pm on Friday 25 November**
- **3am to 12pm on Monday 28 November**
- **3am to 12pm on Tuesday 6 December**

Newly constructed retaining wall near the Paintshop

Where will work take place?

The above map shows our work areas and site compounds. The project team will utilise the site compounds for deliveries, storage of materials and equipment, offices, pre-start work meetings and worker parking.

All work and deliveries are dependent on weather and site conditions and is subject to change.

What’s planned over the holiday season?

Work will stop for the Christmas break from **Friday 23 December 2022 to Sunday 8 January 2023**. You may notice small crews carrying out security and maintenance checks of the sites over this period.

The project team would like to thank you for your patience during our work throughout 2022, and we wish you and your family a happy holiday season.

How do we consider the community?

The project team understands construction activities may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.
