

# More Trains, More Services Program

## Sydney Terminal Area Reconfiguration Project

June 2020

### Project overview

Upgrades to rail infrastructure between Sydney Terminal and Erskineville Junction are required to support the introduction of the new fleet of trains operating on the South Coast Line that will access platforms 1 to 14 at Central Station.

Upgrades include:

- reconfiguration of the railway tracks
- overhead wiring
- underground utilities, drainage and signals.

A construction contract has been awarded to Next Rail comprising of John Holland and Jacobs who will work in partnership with Transport for NSW to deliver More Trains, More Services (MTMS) projects between Sydney Terminal and Hurstville.

Planning approval has been granted and construction will start this month. This project will take approximately two years to complete.

### Trackwork weekends – 13 and 14 June and 20 and 21 June

Investigation work and geotechnical surveys will start this month at Erskineville ahead of the project team starting main construction work. During June, work will take place on:

- **Saturday 13 and Sunday 14 June, 7am to 6pm**
- **Saturday 20 and Sunday 21 June, 7am to 6pm.**

This work is required to locate and identify underground services and assess the tracks. The following activities will take place:

- temporary site establishment
- geotechnical and utility investigations
- survey works.

### What you may notice

Equipment to be used during this work will include light vehicles, a hi-rail excavator, vacuum truck, HIAB truck and hand tools. Workers and vehicles will be accessing the rail corridor via the gates at Railway Parade and Erskineville Road.

Every effort will be made to minimise any construction impacts to the local community. We will keep the community informed prior to any activities taking place.
