

Sydney Terminal Area Reconfiguration – Central Station

More Trains, More Services

June and July 2023

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The More Trains, More Services program will simplify and modernise the rail network creating high capacity, turn up and go services for many customers.

Upgrades to rail infrastructure are underway to support the introduction of the new fleet of trains that will access platforms 1 to 14 at Central Station. We are also integrating Sydney Metro City and Southwest into Sydney's train network.

What work are we doing?

Throughout the past two and a half years, we have been gradually installing new assets inside the rail corridor. In June and July, we will be commissioning some of these assets for operational use. This represents a significant milestone for our project and we would like to thank you for your patience to date.

In June and July, we will also undertake:

- installation of new track and removal of redundant track
- signalling and cable identification and testing
- further site survey and investigation, including geotechnical activities such as bore holing and non-destructive digging involving a Hi-Rail vacuum truck
- investigation and installation of overhead wiring infrastructure and cabling routes.

When and where we'll be working

In June and July, work will take place inside our site compounds and the rail corridor as shown overleaf on the map.

Standard construction hours are between **7am and 6pm Monday to Friday** and **8am and 1pm on Saturdays**.

Out of hours work and deliveries

Some work and deliveries are required to take place outside of standard construction hours, including between:

- **10pm Friday 9 June and 2am Monday 12 June**
- **10pm Tuesday 13 June and 7am Wednesday 14 June**
- **6pm Friday 16 June and 7am Monday 19 June**
- **10pm Tuesday 4 July and 10pm Monday 10 July**
- **10pm Friday 21 July and 2am Monday 24 July.**

Why we work outside of standard construction hours

We schedule work outside of standard construction hours, to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- lighting from temporary lighting towers
- noise from machinery and equipment.

Location of work

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We are going paperless

We are committed to reducing our paper usage and environmental impacts.

Soon we will no longer be distributing paper notifications to residents (unless requested). Instead, we will contact you via email when there is construction work that may impact you.

To register for email updates, please scan the QR code and fill out the form.

If you wish to continue to receive paper notifications, you can request this via the QR code or call us at 1800 684 490.
