

More Trains, More Services

Mascot Power Supply Upgrade Project

What happened in December and January?

During December and January, we carried out site remediation work at 166 and 200 O’Riordan Street and installed survey markers.

What’s planned next?

During February, the project team will carry out the following work:

- asbestos removal
- piling work
- installation of a new driveway
- utility investigations
- modifications to the road alignment and medians.

This work will enable the project team to build a new substation at 166 O’Riordan Street, and underground power supply cable route connecting the electrical substation to the train station on Bourke Street.

These upgrades will create the necessary power supply to support the increase in the number of trains travelling along the T8 Airport line in the future.

How do we consider the community?

Standard construction hours on this project are **7am to 6pm** Monday to Friday, weekends and public holidays. We are committed to keeping the community well informed about our construction activities and notifying about any changes or impacts as early as possible.

The project team understands construction activities may cause disruption for the community. Every effort will be made to minimise impacts where possible including traffic control and signage for vehicles and cyclists. We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

Some out of hours work is planned to safely complete the required work. We will be contacting residents directly who may be impacted by the out of hours work.

What else is happening in Mascot?

Transport for NSW is upgrading access to Mascot Station to improve the flow of customers and reduce crowding in and around the station, making travel easier and more comfortable for train and road users.

During February we will continue early work to prepare for the start of construction. This includes:

- installation of temporary fencing
- vegetation removal
- relocation of utilities including water, sewer, storm water and telecommunications.

For more information about the project visit <https://yoursay.transport.nsw.gov.au/mascot-station-upgrade>.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

Where will work take place?

The above map shows the construction site location at 166 O'Riordan Street and the modification work on Bourke Street between Coward Street and John Street.
