

More Trains, More Services

Mascot Power Supply Upgrade Project

What happened in November?

During November, we continued with geotechnical, utility and survey investigations in the area to help inform the detailed design for the project. The project team began site establishment at 166 and 200 O’Riordan Street, Mascot ahead of starting work on site.

What’s planned next?

During December and January, the project team will carry out the following work:

- delivery of site sheds to 166 and 200 O’Riordan Street
- excavation and piling at 166 O’Riordan Street
- installation of survey markers on O’Riordan Street, Bourke Road and Bourke Street.

How do we consider the community?

Standard construction hours on this project are **7am to 6pm** Monday to Friday, weekends and public holidays. We are committed to keeping the community well informed of our construction activities and being a good neighbour. The project

team understands construction activities may cause disruption for the community.

Every effort will be made to minimise impacts where possible such as traffic control and signage for vehicles and cyclists travelling near site investigation locations. We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

What else is happening in Mascot?

Mascot Station Access Upgrade

During the past month, Transport for NSW invited feedback from the community on the proposal to build a second entrance at Mascot Station on the western side of Bourke Street. We would like to thank the community for your feedback. We are now considering your feedback and will release our responses in the Determination Report, which is due out in the coming weeks. If you have any questions about this project please visit the project website:

<https://yoursay.transport.nsw.gov.au/mascot-station-upgrade>.

Where will work take place?

The above map shows the construction site location at 166 O'Riordan Street and the site compound at 200 O'Riordan Street.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

Did you know?

Next Rail* is committed to 'closing the loop' on soft plastics waste such as food wrappers, plastic bags, chip packets and cling film. To do this, we are collecting soft plastics for recycling to turn into new products, such as asphalt, furniture and other custom products. This means plastic waste is recycled and ensures it doesn't end up in our oceans or landfills.

** Next Rail is the incentivised delivery entity partnering with Transport for NSW to deliver this project.*

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
