

# More Trains, More Services

## Mortdale Maintenance Centre Upgrade

### What's the latest news?

Over the last two months, we have been busy working inside the maintenance centre, completing demolition of dated buildings, pouring concrete foundations for new buildings and retaining walls as well as relocating services and utilities.

### What's coming next?

During February, activities within the maintenance centre will include:

- ongoing piling work for building of foundations and retaining walls
- installation of combined service routes to protect and carry cabling around the substation
- installing cable ladders under the roof of the maintenance building
- concrete work for the completion of pile structural foundations which will support a new workshop building and access road.

*Our personal protective equipment is looking different in the current environment – December 2020*

## Project site establishment

Project site offices have been installed within the Mortdale Maintenance Centre, allowing our construction team to complete pre-start safety briefings and on-site inductions.

*New site offices installed in December 2020*

Standard construction hours on this project are 7am to 6pm, Monday to Friday, weekends and public holidays.

## How are we making our sites safe?

In line with current Australian Government guidelines around slowing the spread of coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

## About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
