

# More Trains, More Services

## Mortdale Maintenance Centre Upgrade

*Construction of the Mortdale Maintenance Centre – November 2021*

### More Trains, More Services

Mortdale Maintenance Centre is being upgraded to enable the entire Tangara fleet to be serviced from this location as part of the More Trains, More Services program.

### What's been happening?

We have been working between 7am and 6pm daily inside the Mortdale Maintenance Centre on:

- construction of a new bogie exchange system which will enable train wheels to be automatically removed from carriages and transported for maintenance
- extending the driveway entrance from Hurstville Road to incorporate an exit road for improved safety during deliveries
- upgrading the electrical substation to increase electrical capacity.

### What's next?

Work at the centre will stop from Thursday 23 December 2021 and recommence on Monday 10 January 2022.

When work resumes in the new year, we will start constructing the new maintenance centre and a new substation carpark.

Between January and March 2022 our activities will include:

- erecting steelwork for the new maintenance buildings, cladding, roofing and fit-out
- commissioning of the new substation
- modifications to the existing maintenance centre entrance off Hurstville Road
- extending rail track into the bogie exchange system
- installation of overhead wiring switches and supporting structures.

## Traffic and pedestrian impacts on Hurstville Road

To safely enable the extension of the centre driveway off Hurstville Road, some minor traffic and pedestrian impacts have been implemented and will continue to operate into the new year.

Traffic controllers will continue to provide alternate access arrangements to assist pedestrians and motorists with alternate access arrangements.

## Night work

Between January and March, some activities are required to take place outside of construction hours (7am – 6pm).

This work has been scheduled to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers. Night work will be carried out between:

- 6pm Friday 14 January and 7am Monday 17 January
- 6pm Friday 21 January and 7am Monday 24 January
- 6pm Friday 11 February and 7am Monday 14 February.

## How can we better communicate with you?

We strive to develop and maintain strong relationships with the residents, businesses, customers and stakeholders within the communities in which we work. We would like your feedback on the way we keep you informed about construction activities relating to the projects we are delivering.

If you would like to provide your feedback, please scan the QR code below or visit [yoursay.transport.nsw.gov.au/community-engagement](https://yoursay.transport.nsw.gov.au/community-engagement) to complete a short 5-minute survey to help us understand how we can better communicate with you.

New substation equipment installed in the Maintenance Centre.
