

# Normanhurst Station Upgrade

Construction Update | March 2023

The Normanhurst Station Upgrade is part of the Transport Access Program to provide a station that is accessible to people with a disability, limited mobility, parents / carers with prams, and customers with luggage.

## What's next at Normanhurst?

During March we will be continuing work on:

- the new lift fit outs
- installing wayfinding signage
- installing communication cables
- landscaping work on Malsbury Road
- installing canopies on the station platforms
- installing new public address system (speakers and passenger displays).

We will also start structural metal work along the stairs and footbridge.

Our standard schedule work hours remain as **Monday to Friday from 7am until 6pm**, and **Saturdays from 8am to 1pm**.

## Weekend work

For the safety of customers, work will take place from **6am Saturday 18 March until 6pm Sunday 19 March**.

The work to be carried out includes hearing loop installation (sound system for use by people with hearing aids) and station electrical work.

We have planned our weekend work to coincide with Sydney Trains trackwork. **The station will be closed as trains will not be running.**

For more information on replacement buses please visit [transportnsw.info](https://transportnsw.info) or call 131 500.

## Out of standard work hours

We will also be working from **8pm Wednesday 15 March until 3am Thursday 16 March**, to carry out electrical upgrade works on **Denman Parade**.

A partial road closure will be in place on Denman Parade with traffic controllers to assist motorists and pedestrians.

Please note there may be outages in the area due to works being carried out by Ausgrid. Any properties impacted by works will be contacted directly by Ausgrid.

## How this work may affect you

We will be using a range of equipment throughout March, including excavators, jackhammers, compactors, trucks, grinders and various hand and power tools.

Our work will be noisy at times. Where possible measures will be implemented to reduce noise including turning off equipment when not in use, placing equipment as far away as possible from properties and using non-tonal reversing beepers.

## Changes to scheduled work

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be significant changes to the construction program.

## Map of work area

**Please register for project updates** so that we can keep you informed about our work. If you require an alternative method of contact, please do not hesitate to let us know.
