

# Heathcote Road Upgrade

## Out of hours work

October 2023

Transport for NSW acknowledges the Cabrogal people of the Tharawal Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Major work is continuing on the Heathcote Road Upgrade that will help reduce congestion, improve road safety and provide more reliable journeys for all road users.

As part of the Heathcote Road Upgrade, we will be working at the intersection of Heathcote Road and MacArthur Drive. Work will be carried out over five weekends between **Friday 27 October** until **Monday 11 December 2023**.

### What work are we doing?

We will be removing the existing roundabout to prepare the intersection for traffic lights. Our work includes:

- Relocating electricity, gas and telecommunication cables
- line marking and barrier relocation
- installation of stormwater drainage
- building a new footpath
- use of specialist machinery to ensure a smooth finish to the new asphalt.

### When and where we'll be working

We will be working at the roundabout intersection of Heathcote Road and MacArthur Drive on the following weekends:

- **Friday 27 October to Monday 30 October**
- **Friday 10 November to Monday 13 November**
- **Friday 17 November to Monday 20 November**
- **Friday 1 December to Monday 4 December**
- **Friday 8 December to Monday 11 December**

Working hours will be from **8pm Friday to 5am Monday**.

### Traffic changes

This work will involve changed traffic conditions including:

- reduced speed limits
- the use of electronic message signs
- minor traffic delays due to planned detours and lane closures
- movement of plant and equipment across the intersection
- traffic controllers and signage to guide motorists, pedestrians and bike riders.

For those travelling eastbound and looking to access MacArthur Drive, a temporary route adjustment will be in place. You will be directed to the Holsworthy Barracks carpark to turn around, allowing you to access MacArthur Drive from a left turn. Please refer to the map provided.

### Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment. This includes:

- fencing for safety and security
- noisier works completed before midnight
- turning off machinery and vehicles when not in use
- directing lights away from properties where possible.
