

Sefton Park Junction Infrastructure Upgrade

More Trains, More Services

July 2023

Transport for NSW acknowledges the Burramattagal people of the Darug Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The More Trains, More Services program is simplifying and modernising the rail network creating high capacity, turn up and go services for many customers. The next stages of the program include integrating Sydney Metro City and Southwest into Sydney's train network.

What work are we doing?

Electrical upgrades and track modifications are required to improve train movements through Sefton Park Junction.

Work in July includes:

- investigation activities, including site walks and scanning for underground services
- signalling investigation work
- installation of underground cable routes
- drainage installation activities in the rail corridor
- general civil and enabling work
- installation of footings for future signalling work

When and where we'll be working

In July, work will be carried out within and adjacent to the rail corridor at Sefton Park Junction.

Standard construction hours on this project are from **7am until 6pm Monday to Friday and 8am until 1pm on Saturdays.**

Weekend work

Some work is required to take place outside of standard construction hours on this project.

From **6pm Friday 7 July until 7am Monday 10 July** we will be working outside of standard construction hours.

Why we work outside of standard construction hours

We schedule work outside of standard construction hours to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- lighting from temporary lighting towers
- noise from machinery and equipment
- security cameras and motion sensors installed to assist in monitoring, managing and prevention of unlawful activity inside and adjacent to the rail corridor.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We are going paperless

We are committed to reducing environmental impacts and are starting to phase out the distribution of paper notifications.

Instead, we will be providing construction updates via email. To stay informed about construction work in your area, please scan the QR code to register for email updates.

Register to receive important information about upcoming construction work in your area.

If you wish to continue to receive paper notifications, please call **1800 684 490** and ask to speak to a member of the More Trains, More Services team.
