

Sefton Park Junction Infrastructure Upgrade

More Trains, More Services

April 2023

Transport for NSW acknowledges the Buttamattagal people of the Darug Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

What work are we doing?

Electrical upgrades and track modifications are required to improve train movements through Sefton Park Junction.

Work includes:

- service identification
- removing, relocating and reconfiguring track and signalling infrastructure
- modifying electrical assets and combined service routes
- upgrading overhead wiring and structures
- modifying & realigning track
- completing civil and structural activities to support corridor upgrades.

When and where we'll be working

Work will be carried out within and adjacent to the rail corridor at Sefton Park Junction and include:

- investigation activities, including site walks and scanning for underground services
- signalling investigation and correlation work
- dilapidation and site survey work
- general civil enabling works
- modifications to existing electrical infrastructure
- non-destructive digging
- installation of security cameras and motion sensors to assist in monitoring, managing and prevention of unlawful activity inside and adjacent to the rail corridor.

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Weekend work

Some work is required to take place outside of standard construction hours on this project.

From **6am Saturday 22 April to 6pm Sunday 23 April 2023** we will be working outside of standard construction hours.

Why we work outside of standard construction hours

We schedule work outside of standard construction hours, to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- lighting from temporary lighting towers
- noise from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential

noise impacts to the surrounding community

- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We are going digital

We are committed to integrating sustainable practices into our projects and reducing environmental impacts.

By mid-2023, we will no longer distribute hard copy notifications to residents on this project unless requested.

Please scan the QR code and complete the short survey to let us know how you would like to receive project updates.

If our work is anticipated to directly impact your property and we do not have your contact details, we will still distribute a paper notification to your address to ensure you are aware of upcoming activities.

If you wish to continue to receive paper notifications, you can request this via the QR code as well.
