

More Trains, More Services

Shellharbour Junction Station

More Trains, More Services

The More Trains, More Services program is upgrading the rail network to support the introduction of the Mariyung fleet.

The new 204-metre-long fleet of trains will provide greater comfort and convenience for South Coast customers.

As part of the program, we are extending the platforms at Shellharbour Junction Station so customers can safely access all carriages on the new fleet of longer trains.

Improvements at Shellharbour Junction Station include:

- 33 metre platform extensions on Platforms 1 and 2
- upgrading lighting, closed circuit television, the passenger announcement system, tactile paving and line marking for improved customer safety as required.

We are moving in across the road

In the coming weeks, we are planning to start establishing a site compound and machinery laydown areas to support construction activities. While most of our presence will be contained within 250 metres of Shellharbour Junction Station, one of our laydown areas will be located within the rail corridor adjacent to Dunmore Road, as pictured below.

We will be using existing Sydney Trains access points to enter and exit this laydown area, where we will be temporarily storing material, equipment, machinery and supplies.

For improved safety, visual amenity, and dust containment, this area will be delineated with shade cloth.

Construction hours

The NSW Government has introduced new rules to support industry and continue the delivery of critical infrastructure during COVID-19. In accordance with the Environmental Planning and Assessment (COVID-19 Development – Infrastructure Construction Work Days No.2) Order 2020, **standard construction hours are 7am to 6pm Monday to Sunday, including public holidays.** Note: we will not be working during the Christmas and New Year holiday period.

All work will be carried out in line with current NSW Government Public Health Orders and Restrictions, which are subject to change.

Night work in January 2022

To maintain a high standard of safety and reliability across the transport network, Sydney Trains carries out track work outside of peak times, mostly overnight or on weekends to minimise or avoid disruption to commuter services.

Sections of the tracks are closed so maintenance crews can work safely and efficiently while fixing and upgrading the track and surrounding infrastructure.

We schedule the majority of our night work to coincide with Sydney Trains' track work periods, where no passenger services are running, to help ensure the safety of our construction team and customers.

In January, night work will be carried out between **6pm Friday 21 January and 7am Monday 24 January 2022.**

For up-to-date information about alternative transport services during these times, please visit transportnsw.info or call 131 500.

Minimising community impacts

We understand that construction activities may cause disruption for the community and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents as possible
- installing noise barriers to shield residents from high impact noise activities
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

Wishing you a safe and happy holiday period

More Trains, More Services work at Shellharbour Junction Station will stop from Tuesday 21 December 2021 until Monday 10 January 2022. For more information on the project, please visit yoursay.transport.nsw.gov.au/mtms-shellharbour
