

St Peters Station Upgrade Community Update

Transport Access Program

July 2023

Transport for NSW acknowledges the Gadigal and Wangal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The St Peters Station Upgrade is delivered as part of the Transport Access Program. The upgrade will provide a station precinct that is accessible to people with a disability, limited mobility, parents/carers with prams and customers with luggage.

What work are we doing in July?

We will be:

- Landscaping on Railway Lane
- Installing canopies (steel, glazing, roof and soffit)
- Installing lifts, cladding, glazing and louvre
- Installing opal card reader
- Installing platform furniture and canopies
- Installing and testing of CCTV
- Installing signage and wayfinding
- Installing handrails and platform tactiles
- Installing screens on the footbridge and lifts.

When and where we'll be working

Work at the station continues **Monday to Friday, 7am to 6pm**, and **8am to 1pm on Saturdays**.

Out of hours work

Some activities are required to be undertaken outside standard work hours. These activities have been planned during some scheduled Sydney Trains trackwork weekends as follows:

- **From 6am to 6pm Saturday 1 July and Sunday 2 July**
- **From 6am Saturday 29 July to 10pm Sunday 30 July.**

What will this mean for you?

You may notice:

- Intermittent periods of high noise
- Increase in construction traffic
- Temporary parking restrictions: at times, up to eight spaces on Lord Street will be temporarily unavailable to allow for landscaping work to be carried out
- Temporary closure of station facilities: the Station Master's office and the existing station toilets are currently closed due to investigation work.

Changes to scheduled work

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- Reducing our noise as much as possible
- The use of noise blankets where possible, replacing reversing beepers with clickers
- Traffic control and signage
- Directional lighting pointed away from residential properties wherever possible.
