

# St Peters Station Upgrade Community Update

## Transport Access Program

October 2023

Transport for NSW acknowledges the Gadigal and Wangal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The St Peters Station Upgrade is delivered as part of the Transport Access Program. The upgrade will provide a station precinct that is accessible to people with disability, limited mobility, parents/carers with prams and passengers with luggage.

### What work are we doing in October?

Work includes:

- Testing and commissioning
- Finalising landscaping
- Removing site materials and storage units
- Installing electrical and communication services.

### When and where we'll be working

Work at the station continues **Monday to Friday, 7am to 6pm**, and **8am to 1pm on Saturdays**.

### Out of hours work

For the safety of our workers and the community, we will also be working outside standard hours during a Sydney Trains trackwork periods:

- From **6pm Wednesday 25 October until 6am Thursday 26 October**
- From **6pm Thursday 26 October until 6am Friday 27 October**.

During these periods, we will be carrying out testing and commissioning works on the electrical and communication services

### What will this mean for you?

You may notice:

- Intermittent periods of high noise
- Increase in construction traffic
- Traffic control and signage
- Workers and vehicles around the station

### Ongoing closure of station master's office and station toilets

The station master's office and the existing toilet facilities on the footbridge remain closed while the building remediation work and system upgrades are completed. Additional work will start after the station upgrade is complete.

### Changes to scheduled work

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

### Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- Reducing our noise as much as possible
- The use of noise blankets where possible, replacing reversing beepers with clickers
- Traffic control and signage
- Directional lighting pointed away from residential properties wherever possible.
