

## Transport for NSW

# Stanmore Station

## Safer Cities Program improvements

In early 2024, Transport for NSW will implement additional improvements to Stanmore Station as part of the Safer Cities program. Insights from local women, girls, and gender-diverse individuals in December 2022 have shaped these upgrades.

The integration of lighting, wayfinding, public art, and activation is designed to create more welcoming public spaces, particularly around transport hubs.

Our goal is to ensure that women, girls, and gender-diverse individuals feel secure moving around their local areas at any time of day.

### Key improvements planned

- The Douglas Street forecourt will have a more welcoming, open atmosphere featuring added lighting, extended seating, repainted underpass entrance, and upgraded signage.
- The Trafalgar Street entrance improvements will include new lighting along the external Trafalgar Street boundary wall and an extension of public art installations.
- The station underpass will be enhanced with artwork, improved lighting and acoustic panelling.
- Additional CCTV cameras will be installed.
