

Sydney West Overhead Wiring Upgrade – Seven Hills

More Trains, More Services

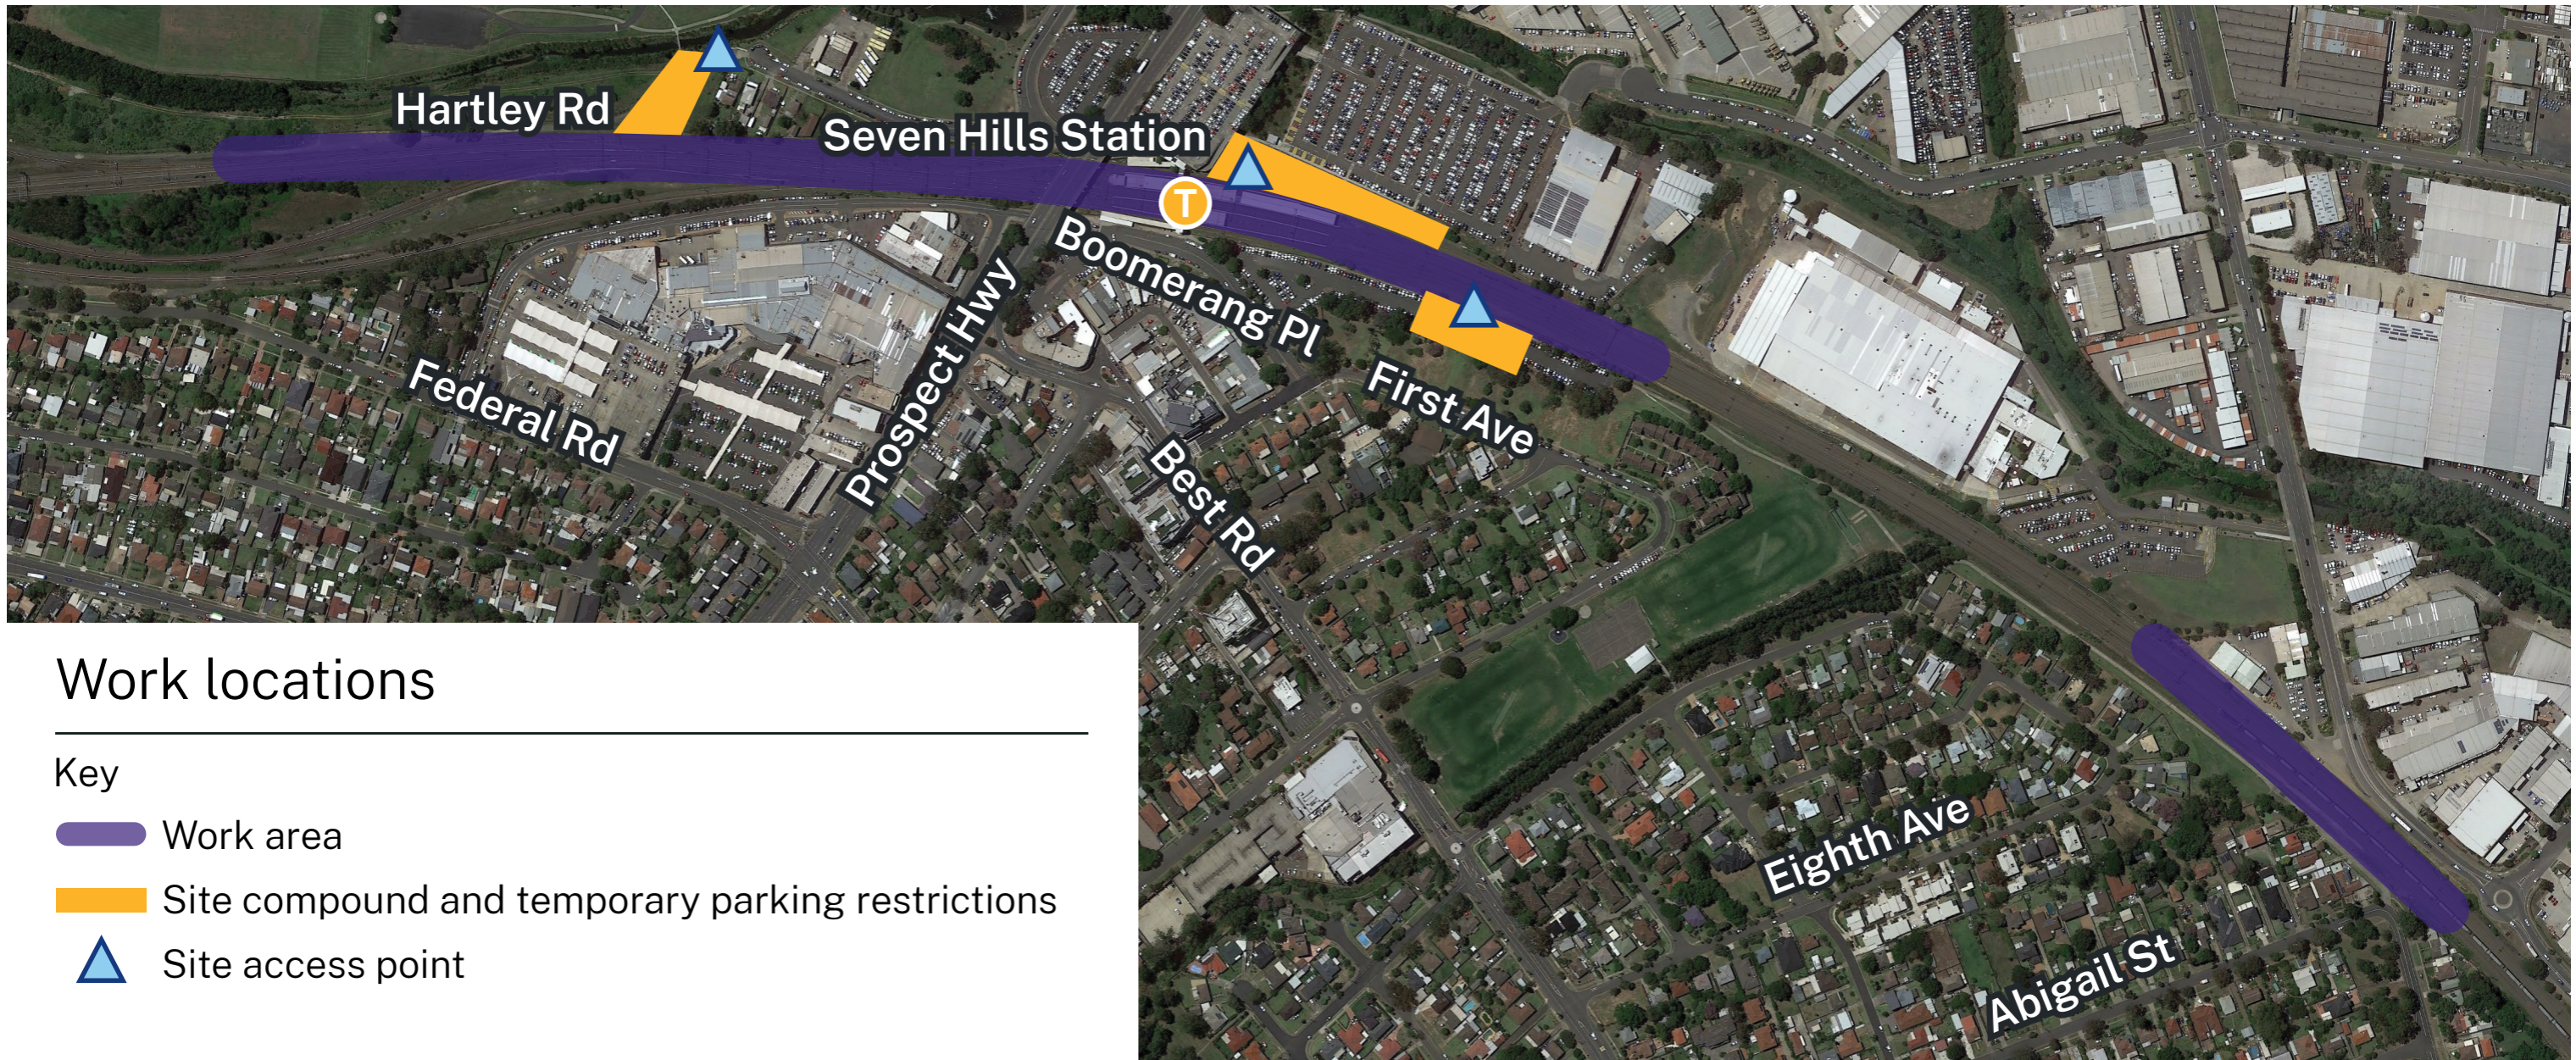

November 2022

The More Trains, More Services program will simplify and modernise the rail network creating high-capacity, turn-up-and-go services for many customers. It means customers can expect more frequent train services, with less wait times, less crowding on a simpler and more reliable network.

This project will upgrade the overhead wiring infrastructure inside the rail corridor in Seven Hills Station. The project scope will include the installation of new overhead wiring and modifications to existing overhead wires.

A contract has been awarded to Next Rail, a partnership between John Holland, Jacobs and Transport for NSW, to start early work for the Sydney West Overhead Wiring Upgrade project.

Work locations

Key

-  Work area
-  Site compound and temporary parking restrictions
-  Site access point

Next steps

Over the coming weeks you will see the following work start on site:

- site surveying and investigation work to locate existing underground services and assist with better understanding ground conditions
- preparatory civil work to enable main construction.

When we'll be working

Investigation work will start in late November 2022 and take place through early 2023 in preparation for the main construction work to commence.

Work will take place during standard construction hours from **7am until 6pm Monday to Friday and 8am until 1pm on Saturdays.**

Some construction activities are carried out out-of-hours. We schedule the majority of our out-of-hours work to coincide with Sydney Trains' track work periods, where no passenger services are running, to help ensure the safety of our construction team and customers.

Out-of-hours work is planned from 4am Saturday 3 December to 10pm Sunday 4 December 2022.

Where we'll be working

Investigation work will occur inside the rail corridor in Seven Hills as shown on the map above.

To support upcoming out-of-hours work, temporary site compounds and other workforce facilities will be located inside the carpark at Boomerang Place, on Hartley Road and just north of Seven Hills Station. The compounds will be removed following the work on Monday 5 December 2022.

Temporary parking restrictions

From 7am Friday 2 December to 12pm Monday 5 December 2022 there will be a temporary loss of up to five parking spaces inside the carpark at **Boomerang Place**. This is due to the temporary site compound being established in this location.

Changes to planned work

Due to various factors associated with work in the rail corridor, there is always a possibility that some of our planned work may be postponed or cancelled. We will keep you updated if any planned work is rescheduled.

Minimising community impacts

We understand that construction activities may cause disruption for the community and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents as possible
- installing noise barriers to shield residents from high impact noise activities
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We appreciate your patience and understanding during the upcoming work.

Keeping you up to date

We will keep our customers and impacted residents and businesses informed about the project via our project web page. For more information, please visit: yoursay.transport.nsw.gov.au/mtms-swowu

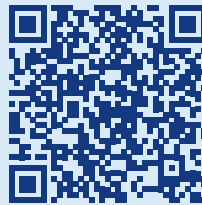

We're going paperless

Between 2018 and 2019, Australia generated 6.6 million tonnes of paper and cardboard waste. We are committed to integrating sustainable practices into our projects and reducing environmental impacts.

By 2023, we plan to phase out hard copy notifications to residents, unless requested. Instead, we will be digitally distributing construction updates to project-specific email lists.

To help us reduce paper waste, please visit our website or scan the QR code below to complete a two-question survey and let us know if you would prefer to receive our updates in your inbox instead of your mailbox.

We will continue to remind you of this transition and plan to go entirely digital from January 2023.
