

# More Trains, More Services

## T8 Airport Line Power Supply Upgrade Project

### What are we doing?

We are upgrading the power supply in the T8 Airport Line tunnel from Central to Wolli Creek to support the introduction of the new fleet of trains operating along the T8 Airport Line.

### What work was carried out in 2021?

During 2021, the project team carried out the following work:

- installed cables on Wyndam Street from the Rail Operations Centre to Green Square Train Station
- installed cables in the T8 Airport Line tunnel to enable more power to the rail line.

### What's planned next?

During upcoming work in the T8 Airport Line Tunnel the project team is required to place a generator outside the Rail Operations Centre (ROC) on Mandible Street which would provide back-up power if necessary to the T8 Airport Line.

The generator will be placed immediately outside the ROC. The pedestrian path at this location will be closed from 7am, Wednesday 9 February through to 3:30pm, Wednesday 23 February.

In the unlikely event the generator needs to be switched on, the project team will contact the building management of the nearby apartment buildings with an update on any anticipated noise impacts.

These works are dependent on weather and site conditions and are subject to change.

### Where will work take place?

The above map shows the location of the parked generator on Mandible Street near Wyndham Road.

### How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

### About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
