

Upcoming night work

As part of the More Trains, More Services work at Waterfall, we are required to complete some night activities outside of standard construction hours (7am-6pm) **next Monday 17 January between 12am and 5am.**

This work has been scheduled to take place during power isolation periods, minimising disruptions to commuter services and improving the safety of our construction team and customers.

These activities will take place inside the rail corridor and are not expected to impact the local community.

We would like to thank you, our closest neighbours, for your ongoing support as we work to deliver an improved rail network.

Minimising impacts

The project team understands that construction activities may cause disruption for the community and every effort will be made to minimise impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- installing noise barriers to shield residents from high impact noise activities
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
