

More Trains, More Services

Waterfall Stabling Yard and Platform Extension Project

More Trains, More Services

As part of the More Trains, More Services program, we are upgrading Waterfall station, the rail stabling yard and associated rail corridor infrastructure to accommodate the Mariyung fleet.

This important work will simplify and modernise the rail network, creating an improved level of comfort and convenience for intercity customers.

Our construction activities extend along a 5 kilometre stretch in the rail corridor between Waterfall station and Heathcote.

Just off the Princes Highway, we have been completing excavation activities, stabilising the rail corridor embankments, installing underground services, relocating track, building traffic barriers, upgrading overhead wiring and installing drainage.

In July we continued trackwork, drainage relocations, upgrades to overhead wiring, signalling modifications, installing cable routes to upgrade service utilities and platform investigation activities.

What's next?

In August, we will be continuing excavation activities to install underground conduit and cable routes, relocate drainage and upgrade service utilities.

Excavated material will be transported from our site at Waterfall to the storage areas in the rail corridor at Helensburgh.

Construction vehicles will continue to access the site using the truck bay off Princes Highway to transport construction materials and enable deliveries.

This month we will be accepting deliveries of new track on the back of extendable trucks for steel turnouts, which enable trains to be guided from one track to another. Installing new turnouts will raise the capacity of the rail network, allowing train services to transition between tracks without interrupting the journey.

Night work

In August, some activities are required to take place outside of standard construction hours (7am-6pm).

This work has been scheduled to take place during a Sydney Trains trackwork period when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Work outside of standard construction hours is scheduled to take place between **6pm Friday 13 and 7am Monday 16 August.**

For up to date information about alternative transport services during these times, please visit transportnsw.info or call 131 500.

Some deliveries of new track will also be arriving outside of standard construction hours on:

- **Monday 23 and Tuesday 24 August**
- **Monday 30 August and Tuesday 31 August** (with the potential to continue into September)

These deliveries will be unloaded in the rail corridor behind the embankment and are not expected to impact the local community.

Minimising impacts

We understand that construction activities may cause disruption for the community and every effort will be made to minimise impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce the potential noise impacts to the surrounding community
- installing noise barriers to shield residents from high impact noise activities
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

How are we keeping our sites safe?

We are continuing to deliver projects across New South Wales while ensuring the safety of all staff and the community. All work will be carried out in line with current NSW Government Public Health Orders and Restrictions.

Keep in touch

We would like to thank you, our closest neighbours, for your ongoing support as we work to improve services on the network.

If you would like to know more about our work at Waterfall, visit the project webpage yoursay.transport.nsw.gov.au/mtms-waterfall or contact us through the avenues listed below.

Translation

If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to contact Transport for NSW on **1800 684 490**.

An interpreter will assist you with translation.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
