

More Trains, More Services

Waterfall Stabling Yard and Platform Extension project

Working in the rail corridor at Waterfall – December 2020

What's the latest news?

Over the last couple of months, we have completed some major construction on the Waterfall Stabling Yard and Platform Extension project, including:

- major excavation work
- overhead wiring work
- underground service removal and relocation
- installation of new track and drainage
- signalling modifications

What's coming next?

In February we will be continuing with bulk excavation, embankment stabilisation, piling for a concrete barrier within the rail corridor, drainage and track installation and over head wiring work.

A lot of earth movement is required to undertake these activities in February, and we will be transporting excavated materials to three spoil

storage locations on Sydney Trains' land between Waterfall and Helensburgh.

In an effort to avoid sending excavated material to landfill, we will re-use spoil at other project locations, including repurposing sandstone to improve natural assets within the Royal National Park.

Temporary traffic changes

To enable safe deliveries, there may be some changes to speed limits on the Princess Highway and brief interruptions to traffic flow on McKell Avenue.

Traffic management and signage will be in place to assist motorists and pedestrians with these changes.

Standard construction hours on this project are 7am to 6pm, Monday to Friday, weekends and public holidays.

Night work

To minimise disruption to commuter services and improve the safety of the construction team, we will be undertaking some activities outside of standard construction hours. This work will take place from **8pm Friday 19 until 2am Monday 22 February**, while passenger trains are not running.

For up to date information about services during these times please visit transportnsw.info or call 131 500.

We acknowledge the disruptive nature of construction work and understand some of our activities may impact the community.

We are committed to minimising disruption on local residents and businesses and will contact you directly if your property is impacted.

Changes to parking

To enable construction activities to be undertaken safely, we will require temporary use of approximately 30 commuter car spaces from **11pm Tuesday 16 until 6pm Wednesday 24 February**

Traffic control will reserve these spaces and signage will be installed in advance to advise motorists about these temporary changes.

Would you like to get involved with re-planting?

Some vegetation removal and tree trimming is required on this project to enable the project team to safely carry out construction.

In accordance with Transport for NSW's Vegetation Offset Guide, any vegetation removal will be considered in our re-planting strategy to achieve a positive ecological outcome and mitigate the impacts of the required clearance.

We will begin re-vegetation initiatives to improve the local environment early this year and are looking for opportunities to get the community involved. If you would like to get involved in restoration activities, please register your interest at **yoursay.transport.nsw.gov.au/waterfall**

We will be updating the project webpage in the coming weeks with timelapse footage showing progress we are making at Waterfall.

Thank you for your patience as we work to improve services on the network.
