

More Trains, More Services

Waterfall Stabling Yard and Platform Extension Project

Photo of Waterfall Station, taken in October 2021. This image shows the temporary modular platform (green surface) which we remove and re-instate to enabling foundation construction for the new staff footbridge.

More Trains, More Services

As part of the More Train, More Services program, we are upgrading Waterfall Station, the stabling yard and associated rail corridor infrastructure to accommodate the Mariyung fleet.

This important work will simplify and modernise the rail network, creating an improved level of comfort and convenience for intercity customers.

Our construction activities extend along a five kilometre stretch in the rail corridor between Waterfall Station and Heathcote.

What's next at Waterfall?

Work will continue on the installation of the new staff amenities building, footbridge, track, drainage and signalling upgrades.

In January and February 2022, we will be working on:

- construction of bridge support piers and columns
- installation of the amenities building support structure
- off-site construction of the new staff amenities building
- continuing bulk earthworks to prepare the railway corridor for the new track
- installing new overhead wiring and signalling equipment, new drainage and cable route installation
- installing new railway track to support the additional train services
- installation of new Ausgrid pole and pole mounted transformer off the Princes Highway (including associated trenching) (works subject to approval).

Electrical upgrade work will also continue at the Heathcote Rail Substation involving trenching work, vacuum trucks and temporary changes to access.

Night work

Between January and February, some activities are required to take place outside of standard construction hours (7am – 6pm).

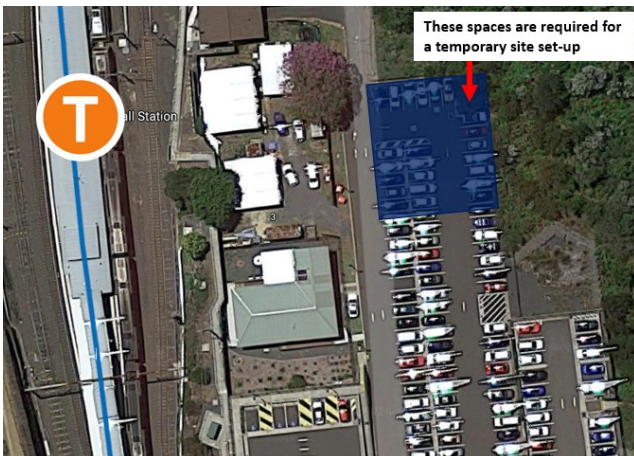

This work has been scheduled to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Night work will be carried out between:

- **6pm Friday 7 January and 7am Monday 10 January**
- **6pm Friday 21 January and 7am Monday 24 January**
- **6pm Friday 4 February and 7am Monday 7 February**
- **6pm Friday 18 February and 7am Monday 21 February.**

Temporary changes to commuter car parking in January and February

To support construction activities at Waterfall we will require temporary use of approximately 30 commuter car spaces (subject to approval) from **Tuesday 4 January until Wednesday 12 January** and **Tuesday 15 February until Wednesday 23 February** (as indicated in the image below).

Temporary impacts to traffic

On **Saturday 5 and Sunday 6 February 2022**, we will be installing a new Ausgrid pole mounted transformer on the northern side of the Princes Highway, opposite Hanrob Pet Hotels. To safely facilitate the overhead wiring work, we will be temporarily closing lanes on the Princes Highway. Traffic control and signage will be in place to assist motorists with these changes.

Installation will involve excavation work, soil removal, installation of new poles, removal of existing infrastructure, attachment of the transformer and associated equipment.

This transformer will provide electric power to new railway assets delivered as part of this project.

More information will be provided closer to the date.

Wishing you a safe and happy holiday season - the More Trains, More Services project team.
