

## More Trains, More Services

# Waterfall Stabling Yard and Platform Extension Project

Transport for NSW | October 2022

### More Trains, More Services

As part of the More Trains, More Services program, we are upgrading Waterfall Station, the stabling yard and associated rail corridor infrastructure to accommodate the Mariyung fleet.

### Upcoming work activities

During October, our major activities include:

- installation of an Ausgrid transformer on the western side of the Princes Highway, opposite Hanrob Pet Hotels. As this work will involve crane movements, cable pulling across Princes Highway and the installation of supporting infrastructure on the side of the highway, intermittent traffic stoppages will be required:
  - **for 5-minute intervals on some weeknights, including Wednesday 5 and Wednesday 26 October 2022**  
*Some additional dates are being finalised with Ausgrid.*

- installation of traffic barriers along the Princes Highway southbound to allow for new security fencing installation **overnight on weekdays, between 6pm and 7am.**  
This work will require the closure of the southbound shoulder and one lane on the Princes Highway.

Work will also continue inside the rail corridor in preparation for the platform extension including:

- construction of new track and removal of old track which will include tamping machines and use of vibratory rollers
- installing new overhead wiring and signalling equipment, new drainage and cable routes
- construction of staff footpaths within the rail corridor, as well as installation of new boundary and security fencing
- construction of new raingardens in the Royal National Park to improve drainage water discharge.

### Upcoming night work

Standard construction hours on this project are **7am until 6pm Mondays to Fridays and 8am until 1pm on Saturdays.**

To improve safety of the community and staff, as well as minimise disruptions to commuters and motorists, we will be completing some construction activities outside of standard construction hours.

Upcoming weekend and night work will take place:

- **overnight on weekdays including Wednesday 5 and 26 October 2022**
- **at Heathcote Substation, across two weekends**  
*Dates to be confirmed – this work is not anticipated to impact the local community.*

Some deliveries and other minor activities will also take place outside of standard construction hours.

We will contact you directly if out of hours work is anticipated to be noticeable at your address.
