

More Trains, More Services

Wolli Creek Power Supply Upgrade Project

What happened in February?

During February, we were busy carrying out vegetation clearing, asbestos removal, excavation and backfill, installation of service utilities and canopies on platforms at Wolli Creek Station.

We would like to thank the residents of Wolli Creek for their patience and support during the track work weekend from 20 to 21 February 2021.

What's planned next?

This month, the project team will carry out the following work:

- asbestos removal
- installation of service utilities
- installation of signal posts
- installation of overhead wiring structures
- piling work
- installation of power and lighting to the platform canopies.

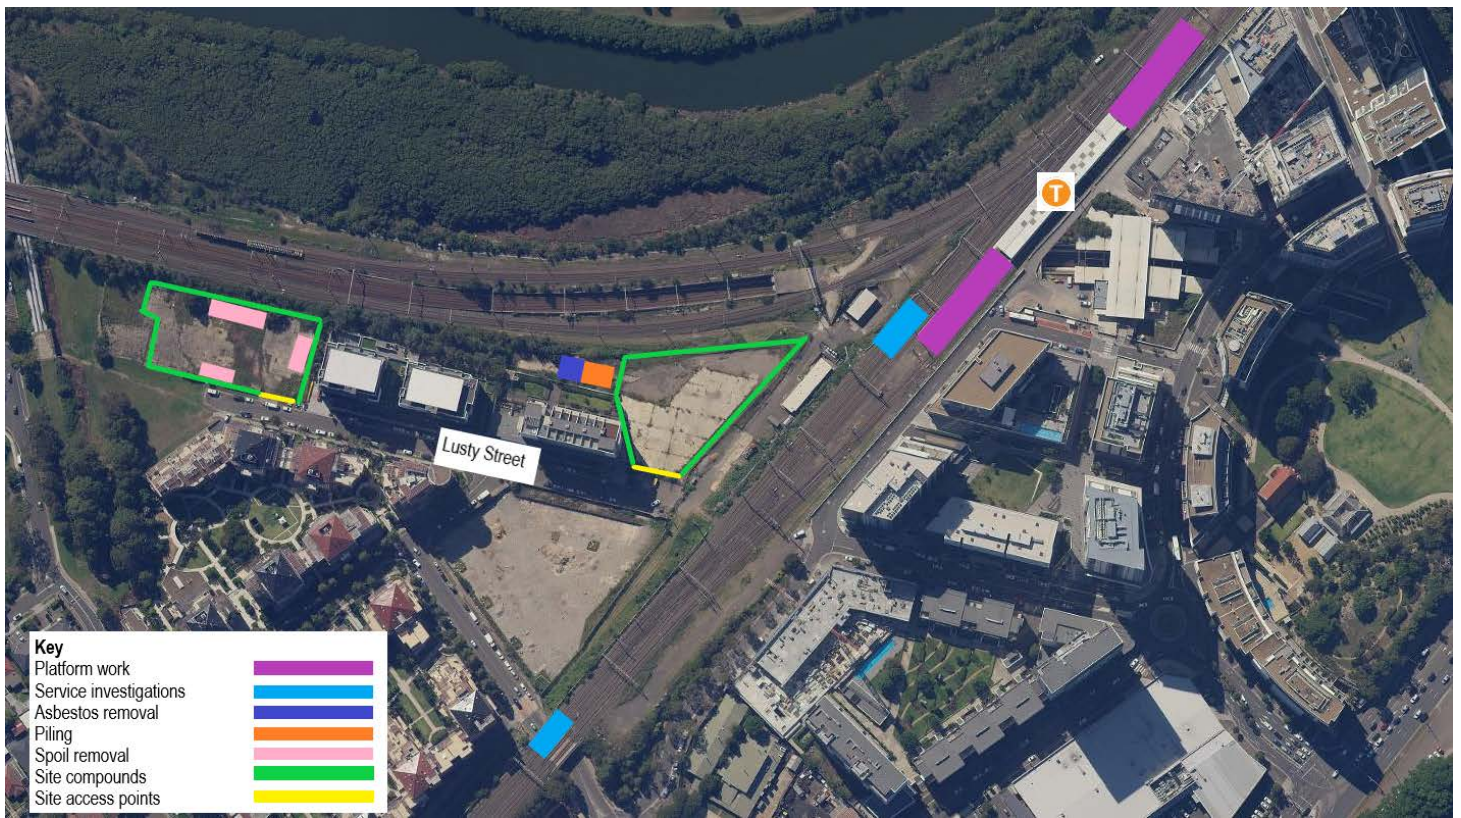

How do we consider the community?

Standard construction hours on this project are **7am to 6pm** Monday to Friday, weekends and public holidays.

The project team understands construction activities may cause disruption for the community and we will seek to minimise impacts as much as possible.

When carrying out our track work, the Project Team utilises a noise assessment of the programmed activities to determine which properties will be offered alternative accommodation and respite vouchers.

We will continue to ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

Where will work take place?

The above map shows the location of work being undertaken at the station and within the rail corridor south of Wollie Creek station with site access via Lusty Street.

Did you know?

Next Rail* is committed to 'closing the loop' on soft plastics waste such as food wrappers, plastic bags, chip packets and cling film. To do this, we are collecting soft plastics for recycling to turn into new products, such as asphalt, furniture and other custom products. This means plastic waste is recycled and ensures it doesn't end up in our oceans or landfills.

** Next Rail is the incentivised delivery entity partnering with Transport for NSW to deliver this project.*

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.
