

More Trains, More Services

Wollongong Stabling Yard and Platform Extension Project

More trains, More Services

The More Trains, More Services program is delivering platform extensions and asset upgrades between Sydney's CBD and the South Coast to support the introduction of the New Intercity Fleet.

The Fleet has officially been named 'Mariyung', the Darug word for Emu, in acknowledgement of local Aboriginal culture.

This important work will simplify and modernise the rail network, creating an improved level of comfort and convenience for intercity customers.

What's been happening?

Wollongong station is being upgraded with extended platforms to accommodate the new 204-metre-long trains, as well as trackwork within the rail corridor to create a new stabling yard.

We have been working along a 1 kilometre stretch south of Wollongong station; installing new track and signalling structures, upgrading overhead wiring, removing redundant infrastructure and relocating underground services.

In June we started working on some major construction milestones at Wollongong including:

- commencing the platform extension works on both platforms 1 and 2
- excavation and transportation of approximately 2,000 tonnes of material
- renewal of existing tracks and associated infrastructure
- installing approximately 1 kilometre of combined services route to carry water, sewer, electrical and signalling cables
- construction of new walkways in the rail corridor for improved access for train drivers.

What else is happening in the rail corridor?

To improve service reliability, Sydney Trains has also been completing track maintenance work in the rail corridor between Wollongong and Coniston.

For more information about Sydney Trains' activity, please call 131 500 or visit transportnsw.info/regional. To report environmental concerns (24hours) please call 1300 656 999.

What's happening in July?

This month, we will continue work on:

- extending platforms 1 and 2, including pouring of the concrete slab structure
- upgrading electrical infrastructure, including modifications to signalling, overhead wiring, light and power systems
- construction of a train driver's walkway
- excavation, transportation and delivery activities to transfer spoil, construction materials, track infrastructure and signalling equipment to and from site.

These activities will result in some temporary parking changes and some activities will be required to take place at night, outside of standard construction hours.

Night work

In July, some activities are required to take place in addition to standard construction hours (7am-6pm) for improved safety of our construction team and customers.

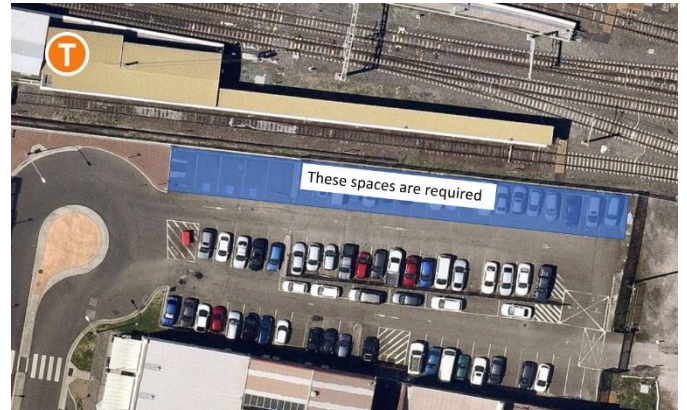

Work outside of standard construction hours is scheduled to take place between **6pm Friday 23 until 7am Monday 26 July**.

This work is scheduled to coincide with Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

For up to date information about alternative transport services during these times, please visit transportnsw.info or call 131 500.

Temporary parking changes

From **6am Friday 23 until 7am Monday 26 July**, we will require use of approximately 25 car parking spaces in the commuter car park south of Wollongong station to enable activities for the platform extension to be completed safely.

Our traffic controllers will install signage to reserve these spaces and advise motorists of temporary changes.

Alternate parking will remain available in the both the multi-storey car park to the west of the station and the commuter car park to the east of the station.
