

## Have your say

### Traffic improvement work on Lawrence Hargrave Drive at Thirroul

Transport for NSW | June 2023

Transport for NSW has listened to the community's concerns and will seek feedback on proposed safety and traffic improvements on Lawrence Hargrave Drive at Thirroul.

#### What are we doing now?

Transport for NSW will continue to carry out road surface improvements on Lawrence Hargrave Drive from **Monday 5 June**, weather permitting. This involves pavement resheeting work between Lachlan Street and Hewitts Avenue, followed by asphalt patching work from Bulli Pass to Phillip Street.

Work will take place under traffic control over five nights between 8pm and 4am, weather permitting. Temporary pavement markers will be placed on the road to guide traffic, during and after this work.

This work is in direct response to concerns raised by local community members about the condition of the road. This will be the only work carried out on Lawrence Hargrave Drive until consultation on the road safety improvements is completed.

#### How will this work affect you?

There will be some noise associated with this work. We will make every effort to minimise noise for residents by:

- turning off machinery and vehicles when not in use
- using noise shields where possible
- directing temporary lighting down and away from homes
- scheduling noisy activities earlier in the night, where possible.

#### Traffic impacts

A reduced speed limit of 40 km/h and a single lane closure will be in place during work. Residents will have access to their properties during the works.

Transport for NSW customers are advised to follow the direction of traffic control at all times and allow up to five minutes additional travel time.

For the latest traffic updates, you can call 132 701, visit [livetraffic.com](https://www.livetraffic.com) or download the Live Traffic NSW App.

#### Proposed future traffic improvements

Proposed minor changes on Lawrence Hargrave Drive have been developed following feedback received during consultation in 2021.

These permanent changes would achieve multiple traffic outcomes for all our transport customers, including public transport users, by easing congestion, increasing road safety and improving traffic flow.

The proposal includes:

- Installing right turn bays into High Street and Wrexham Road, formalising existing informal arrangements and allowing through traffic to flow with improved safety and efficiency.
- Relocating two southbound parking spaces to the northbound side of Lawrence Hargrave Drive, increasing on-street parking in the area.
- Relocating the southbound bus stop near High Street about 50 metres north to facilitate the changes detailed above.

All resident access will be safely maintained although there may be some minor changes.

More information on these proposed changes can be found in the map over the page.

## How to have your say

We want to know your thoughts on these proposed changes. To complete the survey, scan the QR code below or visit:
