

Edmondson Park Commuter Car Park

Commuter Car Park Program

October 2023

Transport for NSW acknowledges the Traditional Custodians of the land and pays respects to Elders past and present.

Construction is underway on the Edmondson Park North Commuter Car Park, which will provide approximately 900 new parking spaces. This will result in a net increase of over 700 additional parking spaces for passengers when the existing car park to the north of the station is closed to the public.

What work are we doing?

The following activities are planned for October:

- modifying the access road to the new commuter car park
- internal fit out including painting, electrical and plumbing work
- installing solar panels
- removing scaffold

When and where we'll be working

We'll be working within the site compound off Soldiers Parade, Edmondson Park.

Standard work hours are **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday.**

Subject to approvals, road work along Soldiers Parade is planned to start in late October to upgrade traffic lights with pedestrian crossing at the intersection of Soldiers Parade and Henderson Road (refer to map overleaf).

There may be some temporary changes to access during this work. Signage and traffic control will be in place to assist pedestrians and motorists.

What will this mean for you?

You may notice:

- workers and vehicles
- traffic controllers and signage
- noise from machinery and equipment

Equipment to be used may include excavators, rollers, road saws, graders, tipping trucks, concrete mixers, concrete pump trucks, service vehicles, various delivery vehicles, mobile cranes, forklifts, generators and hand tools.

Managing our impacts

Our site has been designed to minimise impact to the community and environment. This includes:

- fencing for safety and security
- reducing our noise as much as possible
- targeted lighting to minimise light spill
- traffic control to help manage construction vehicles entering and leaving our site

Edmondson Park South Commuter Car Park

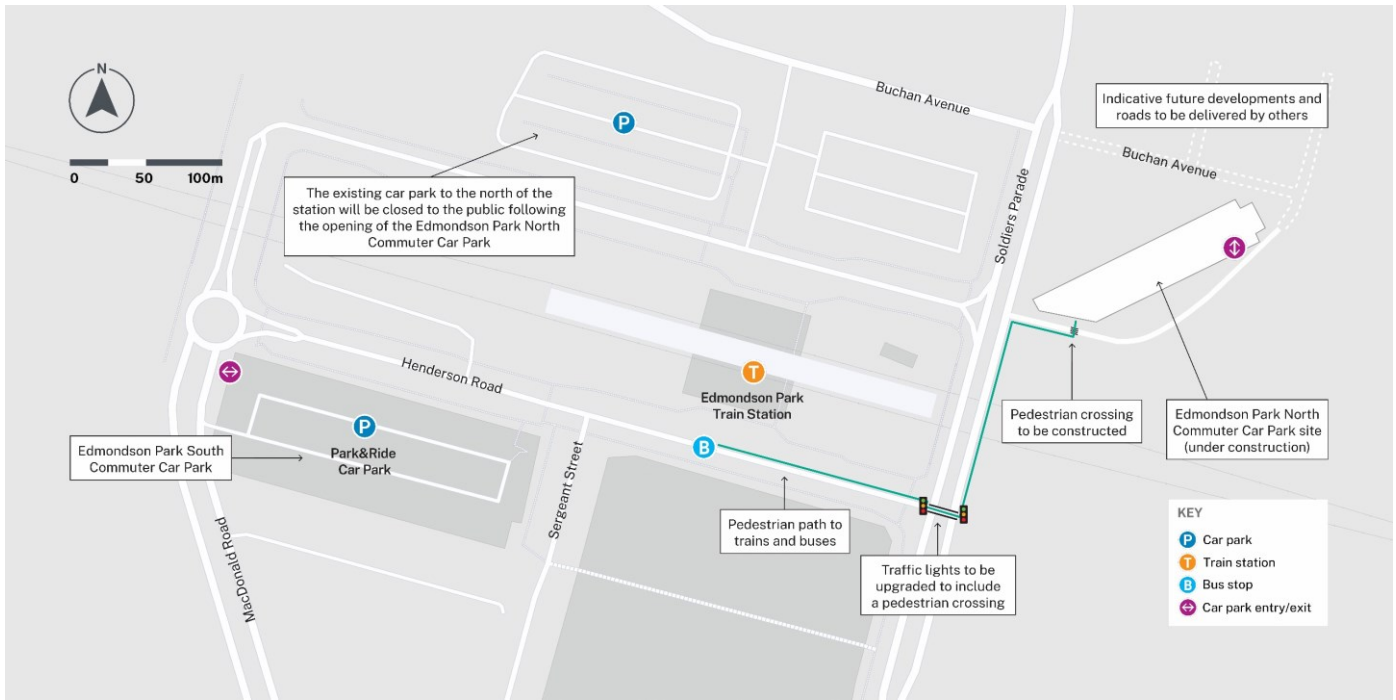

Work is underway to resolve noise concerns during high wind conditions from the façade at the Edmondson Park South Commuter Car Park. Transport for NSW and our delivery partner, AW Edwards have been working to identify the source of noise, how it relates to windy conditions and find ways to resolve the issue.

Solid steel sheets are currently being installed on the rooftop level façade to help reduce noise from the car park during high wind conditions. This is expected to be completed in October, subject to weather conditions.

Over the coming months, we will use noise loggers already installed at nearby residential areas to assess noise levels and determine if additional measures are required on the lower car park levels.

We thank you for your patience and will continue to keep you updated as work progresses.
