

Work continuing: Thompson, Whylandra, Bourke and River Streets in Dubbo

Newell Highway Upgrade – New Dubbo Bridge project

October 2023

Australian Government

Transport for NSW acknowledges the Wiradjuri people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Together, the Australian Government and the New South Wales Government are jointly funding the \$220.2 million New Dubbo Bridge project to improve traffic congestion in Dubbo and enhance access across the Macquarie River during flood events.

Construction is continuing at various locations in Dubbo throughout the next eight weeks, led by our head contractor, Abergeldie Complex Infrastructure.

What work are we doing?

- Commencement of river piling
- Continuation of delivery of girders that will help support the weight of the bridge
- Commencement of pier and headstock construction, which will support the girders
- Continuation of utility relocation and upgrade work
- Utility investigations and traffic controls including barriers and temporary lane realignment.
- Preparation for earthworks

Traffic changes

Crews will continue to relocate and install utilities at the intersection of **Bourke Street and River Street**.

During **October**, we will continue to remove the median strips at the intersection of **Whylandra Street and Thompson Street**.

We'll be working **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday**.

Nightwork

To minimise traffic impacts, some work may be completed at night. Nightwork will be carried out at the following locations during October and November:

- Intersection of Whylandra and Thompson Street from **6pm to 7am** from Tuesday 3 October for up to three weeks.
- Intersection of River and Bourke Street from **6pm to 7am** from Tuesday 3 October for up to three weeks.

We will continue to work closely with the community and provide additional information and key dates to ensure we minimise any impacts of this work.

What will this mean for you?

You may notice workers and vehicles, traffic controllers and signage, concrete barriers in the road shoulders and reduced speed limits of 40km/h at the various construction locations. There may also be footpath and lane closures, noise from machinery and equipment, and an increase in deliveries and vehicle movements.

Managing our work

We will make every effort to reduce disturbances to the local community and motorists in the area by keeping noise to a minimum.
