

# Normanhurst Station Upgrade

## Transport Access Program

Community update - May 2023

Transport for NSW acknowledges the Darug and Guringai peoples as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The Normanhurst Station Upgrade is part of the Transport Access Program to provide a station that is accessible to people with a disability, limited mobility, parents / carers with prams, and customers with luggage.

### What work are we doing?

During May we will be:

- completing the new lifts
- installing communication cables
- installing new public address system (speakers and passenger displays)
- installing wayfinding signage
- installing canopies on the station platforms
- installing metalwork on the stairs and footbridge.

### When will we be working?

Our standard scheduled work hours are **Monday to Friday from 7am until 6pm**, and **on Saturday from 8am until 1pm**.

### Upcoming night work

We will also start working on electrical testing inside and around the station.

Due to safety reasons, this work is required to be carried out at night. We are planning this work, weather and site conditions permitting, to take place over:

- **one night shift from 8pm Sunday 30 April until 4am Monday 1 May** to allow commissioning and testing of the new padmount. This work will generate noise, and we will contact directly

impacted residents in advance.

- **over four-night shifts from 10pm until 5am on Monday 1 May until Friday 5 May** for electrical testing work inside the station building. This night work during the week is not expected to generate loud noise.

### How this may impact you?

We will be using a range of equipment throughout which includes excavators, jackhammers, compactors, trucks, grinders and various hand and power tools.

Our work may be noisy at times. Where possible measures will be implemented to reduce noise including turning off equipment when not in use, placing equipment as far away as possible from properties and using non-tonal reversing beepers.

### Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- reducing our noise as much as possible
- the use of noise blankets where possible, replacing reversing beepers with clickers
- traffic control and signage will be in place
- directional lighting pointed away from residential properties wherever possible.

## Changes to scheduled work

Work schedules are subject to change due to permits, weather, and site conditions.

Further notification will be provided should there be a significant change to the construction program.

We thank you for your patience during this important work.
