

Nowra Bridge project

Upcoming night work | June 2023

Upcoming night work

Night work will be carried out from **Thursday 1 June to Friday 30 June 2023**, on the Princes Highway, Scenic Drive, and Bolong and Illaroo roads. Traffic changes will include lane closures, intermittent stop/slow traffic conditions, and reduced speeds of 40 km/h during work.

For the safety of workers and road users, and to avoid extended traffic delays during the day, works will be done at night between 6pm and 7am, weather permitting.

Details of planned work

Location	Activities	Occurrence
Princes Highway (between Mattes Way and Illaroo Road)	Placing and removing temporary traffic barriers and material. Saw cutting and milling road pavement. Installing drainage, street lighting, footpath, road pavement, median islands, and kerb and gutter. Line marking activities.	Up to 16 nights
Bolong Road (including intersection with the Princes Highway)	Placing and removing temporary traffic barriers and material. Saw cutting. Installing drainage, street lighting, traffic control systems, footpath, road pavement, median islands, and kerb and gutter. Line marking activities. Material stockpiling and deliveries.	Up to 16 nights
Illaroo Road (including intersection with the Princes Highway)	Placing and removing temporary traffic barriers and material. Installing street lighting, traffic control systems, road pavement, kerb and gutter, and structural signage. Line marking activities.	Up to 16 nights
Princes Highway (between Illaroo Road and Bridge Road)	Structural barrier works on the middle bridge (1980's concrete bridge)	Up to 5 nights
Scenic Drive	Vehicle movements, earthworks, material stockpiling and deliveries.	Up to 16 nights
Princes Highway (between Bridge Road and Moss Street)	Vehicle movements (early morning, between 6am – 7am)	Up to 10 nights

Why is work carried out at night?

There are a number of reasons why work is required outside standard construction hours including:

- Safety – work outside standard construction hours helps us improve safety by minimising the interactions between road users, pedestrians and workers
- Traffic – to safely carry out activities, traffic may be stopped, detoured or reduced to one lane. By working at night, delays are minimised and journey times for motorists and businesses are less affected
- Utilities – work may be required at night to minimise impacts on utility services and networks
- Weather – even when it's not raining, temperature and wind can impact activities including placing concrete and laying asphalt
- Quality – the quality of concrete and asphalt can be impacted if activities are not continuous

How will the work affect you?

During this work we will be using machinery and equipment that generate light, noise and vibration. We will make every effort to minimise disruption by:

- turning off machinery and vehicles when not in use

- using noise shields
- directing temporary lighting down and away from homes
- planning activities close to residents within standard construction hours and scheduling noisy activities earlier in the night, where possible
- fitting equipment with devices to minimise noise including reversing squawkers rather than beepers
- monitoring noise so we can manage any potential impacts and adjust our work, where possible.

Equipment being used during night work includes light vehicles and trucks, cranes, elevated working platforms, lighting towers, power tools, concrete pump trucks, drill rigs, water trucks, street sweepers, asphalt machinery, rollers, excavators, and graders. We will continue to monitor noise and vibration impacts during this work.
