

St Peters Station Upgrade Community Update

Transport Access Program
September 2023

Transport for NSW acknowledges the Gadigal and Wangal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respects to Elders past and present.

The St Peters Station Upgrade is delivered as part of the Transport Access Program. The upgrade will provide a station precinct that is accessible to people with a disability, limited mobility, parents/carers with prams and customers with luggage.

What are we doing in September?

Work includes:

- Continuing landscaping on Railway Lane
- Installing lights, downpipes and gutters on the stair canopies
- Installing handrails and platform tactiles
- Installing an Opal card reader on Platform 3
- Installing and testing CCTV and PA system
- Installing signage and wayfinding on the lifts, station platforms and platform seats
- Testing and commissioning lifts.

When and where we'll be working

Work at the station continues **Monday to Friday, 7am to 6pm**, and **8am to 1pm on Saturdays**.

What will this mean for you?

You may notice:

- Workers and vehicles around the station
- Intermittent periods of high noise
- Increase in construction traffic
- Traffic control and signage.

Ongoing closure of station master's office and station toilets

The station master's office and the existing toilet facilities on the footbridge remain closed while the building remediation work and system upgrades are completed. Following investigations, the extent of work required is more than originally anticipated. Additional work will start after the station upgrade is complete.

Changes to scheduled work

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- Reducing our noise as much as possible
- Using noise blankets where possible, replacing reversing beepers with clickers
- Directional lighting pointed away from residential properties wherever possible.
