

Sydney West Overhead Wiring Upgrade - Toongabbie

More Trains, More Services

November 2023

Transport for NSW acknowledges the Tugagal clan of the Darug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The More Trains, More Services program will simplify and modernise the rail network creating high capacity, turn up and go services for many customers.

This project will upgrade the infrastructure inside the rail corridor at Toongabbie to improve train movements through the station.

What work are we doing?

Work inside the rail corridor will include:

- modifying electrical infrastructure such as cables and overhead wiring structures
- installation of new metal cable covers.

When and where we'll be working

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays.**

For safety reasons some work will take place outside of standard construction hours when no trains are running **from 10pm Friday 17 November through to 2am Monday 20 November 2023.**

We will be working inside the rail corridor and will use site access points on Wentworth Avenue to load/unload material and equipment as shown on the map overleaf.

What will this mean for you?

Some of our work will take place next to a live train line. For safety reasons, we will use a warning system consisting of small explosive devices to alert workers when a train approaches our work area. This is standard practice when working inside the rail corridor.

The warning system will be used near Targo Road between 6am and 6pm on Saturday 18 November and Sunday 19 November 2023. During this time, you may notice short bursts of loud noise (similar to a starting pistol at a running race) and see puffs of smoke inside the rail corridor.

You may also notice:

- workers and heavy vehicles
- noise from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption for the community.

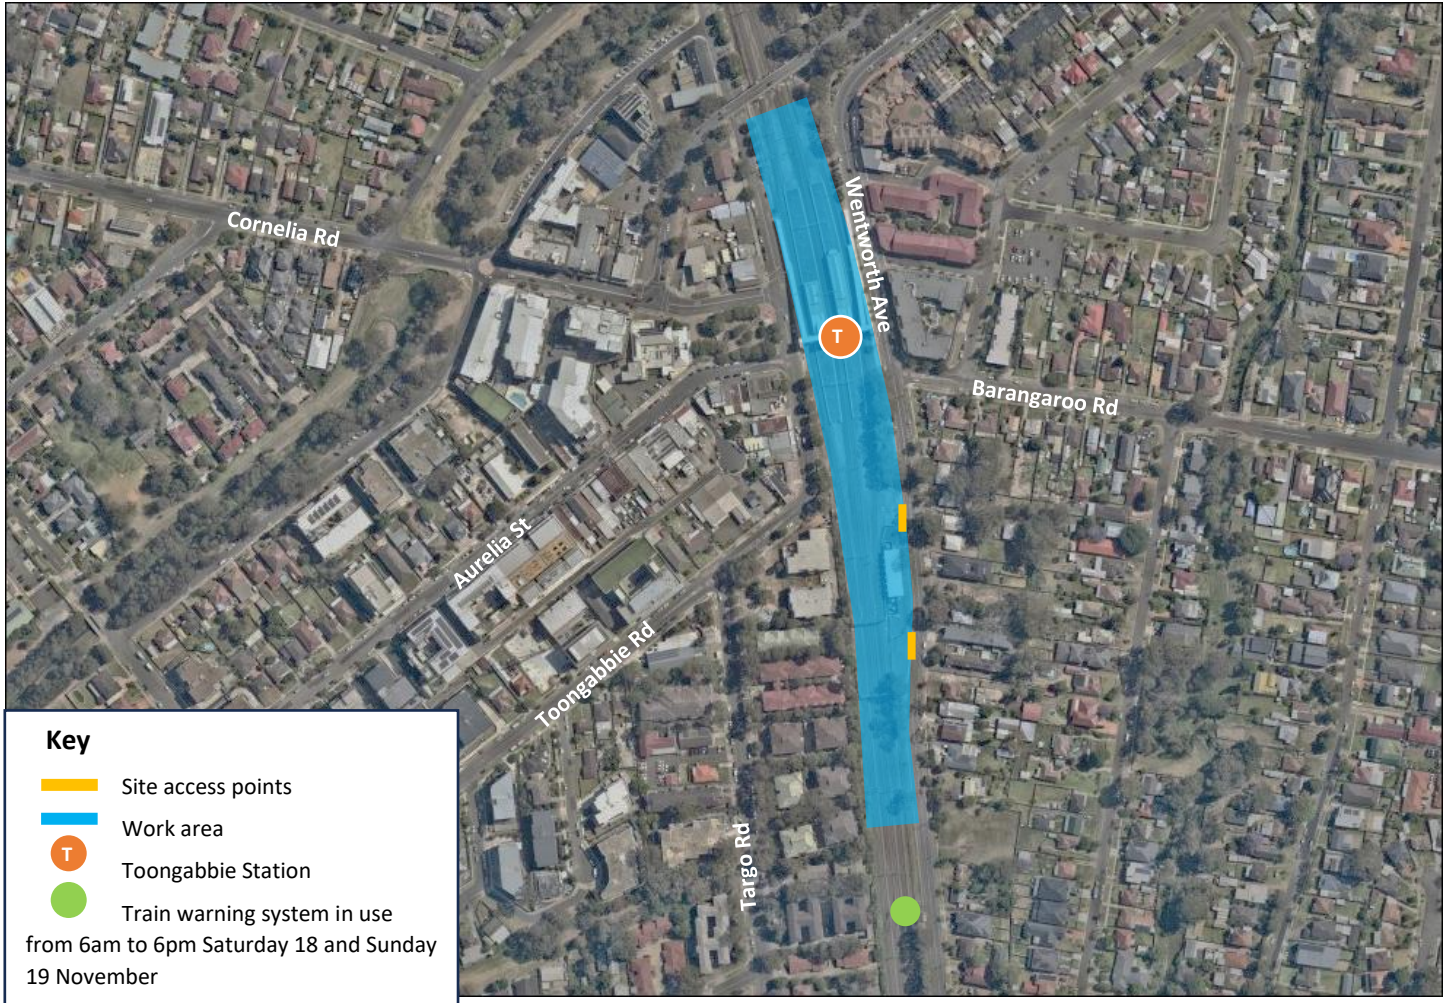

We'll seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

There's a lot happening

Currently there are multiple project teams, transport agencies and contractors working within the rail corridor. For more information on work being completed by Sydney Trains, please phone 1300 656 999 or visit www.transport.nsw.gov.au/sydtraincommunity
