

Thornleigh Station Upgrade

Transport Access Program

Community update - April 2023

Transport for NSW acknowledges the Darug and Guringai people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The Thornleigh Station Upgrade is part of the Transport Access Program to provide a station that is accessible to people with a disability, limited mobility, parents / carers with prams, and customers with luggage.

What work are we doing?

During April we will be continuing work on:

- final lift fit outs
- Railway Parade line marking, signage installation
- minor steelwork installation
- clean-up work on Railway Parade and Thornleigh Station.

When we will be working

Our standard scheduled work hours are **Monday to Friday from 7am until 6pm**, and **from 8am until 1pm on Saturdays**.

Parking and traffic impacts

During April, **five car parking spaces will remain unavailable on Railway Parade** between Station Street and Bellevue Street to allow construction activities to be carried out.

Partial road closures will be in place on **Station Street and Railway Parade** throughout April from **5pm until 7am, Monday to Friday, and all day on Saturday and Sunday**.

A contraflow (stop/go) traffic arrangement including traffic control will be set up to provide directions to pedestrians and motorists on Railway Parade, allowing for the new crossing line markings to be completed.

Access will be maintained along Railway Parade, including access to businesses and properties, while we complete our work.

Changes to scheduled work

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

How this work may affect you

You may notice:

- workers and vehicles
- traffic controllers and signage
- road closures and reduced speed limits
- pedestrian and cyclist detours with traffic controllers on site to guide you
- noise from machinery and equipment.

Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- reducing our noise as much as possible
- use of noise blankets where possible, replacing reversing beepers with clickers
- traffic control and signage will be in place
- directional lighting pointed away from residential properties wherever possible.
