

Brunswick Heads Boat Harbour

Community Update

November 2024

Transport for NSW acknowledges the Arakwal people of the Bundjalung Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government is delivering improvements to maritime infrastructure and facilities state-wide, to help boating and wider community safely access use and navigate our inland and coastal waters.

We thank the harbour user community who helped during the early planning stages and development of a preliminary concept design for a future upgrade of the on-water berthing infrastructure.

What is happening now?

As the Harbour Managers, we continue to manage and maintain the Brunswick Heads Harbour area and available funding will be used to deliver critical harbour work and maintenance needed.

We are currently planning electrical work which will see the upgrade of the power in preparation for any future harbour upgrades.

We are now seeking tenders from accredited electrical contractors to upgrade the power that services the harbour berths.

What work are we doing?

The electrical upgrade work will include:

- Establishing a temporary work site
- Locating existing underground services
- Using machinery to cut into the road
- Installing pipes and cables underground
- Replacing power poles and street lighting
- Restoring and repairing areas disturbed by the work.

When and where we'll be working

We are planning to carry out this work in early 2025 and expect it to take about two months.

Our working hours are **7am to 6pm, Monday to Friday and 7am to 1pm, Saturday.**

Before the start of this work next year, you may see our workers on site carrying out planning activities.

What will this mean for you?

This work should have minimal disruptions for harbour users. Following award of the electrical contract we will provide you further detail on how and when the work will be delivered.

During the work you may notice:

- Workers and vehicles
- Traffic controllers and signage
- Short power outages
- Noise from machinery and equipment.

Location of work area

Managing our impacts

A minor Review of Environmental Factors (REF) which looks at how we manage our impacts is available on our website for your information.

If you have any questions or concerns about this work, please contact our team.
