

Coniston Station – Geotechnical Investigations

Safe Accessible Transport program

November 2024

Transport for NSW acknowledges the Dharawal people as the Traditional Custodians of the lands on which we work and pays respect to Elders past, present and emerging community leaders.

The NSW Government is improving accessibility and safety at Coniston Station as part of the Safe Accessible Transport program.

The Safe Accessible Transport program aims to make public transport safe, inclusive and easy to use for all passengers, especially people with disability, older people, people with prams or luggage and others who may be experiencing mobility problems.

What work are we doing?

The project is currently approved and funded for development activities. Transport is carrying out investigations at Coniston to help inform concept design development.

Geotechnical investigation work includes:

- establishing a temporary work site
- locating existing underground services
- using machinery to undertake geotechnical investigations
- taking soil samples for offsite testing
- backfilling any testing locations
- performing a site clean up once the work is completed.

When and where we'll be working

We'll be working within the station precinct for two to three days between **25 November to 20 December**.

Working hours are **7am to 6pm, Monday to Friday** and **8am to 1pm, Saturday**.

What will this mean for you?

You may notice:

- workers and vehicles
- traffic controllers and signage
- partial road closures and reduced speed limits
- temporary footpath closures
- minor pedestrian and cyclist detours with traffic controllers on site to guide you
- noise from machinery and equipment
- a small number of car park spaces near the train station will be temporarily unavailable.

Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment. Site work has been managed to minimise impact.

This includes:

- fencing for safety and security
- pedestrian signage
- reducing our noise as much as possible by turning equipment off when not in use
- traffic controllers to guide pedestrians and cyclists.
