Site compound corner of Garfield Road West and Creek Street, Riverstone

Nightworks and Ongoing Site Compound Use

Transport for NSW is continuing work on the Pedestrian safety improvements on Garfield Road East, Riverstone.

For this work, we are using the land on the corner of Garfield Road West and Creek Street, Riverstone as a site compound to store materials and equipment. The site compound will be in use until **Saturday 31 August**. The compound will serve as a site office and a pick-up and drop-off area for construction materials. Construction vehicles will access the site via Creek Street only, to minimise impacts on nearby residents.

We will access the site compound during the day and up to five nights a week. Our day work hours are between **7am and 6pm Monday to Friday** and **8am to 1pm Saturdays**. Our night work hours are between **8pm and 5am**, excluding Saturday and Sunday nights. There will be no work on public holidays.

To lessen the disturbance to the community, we will:

- position light towers away from residences and install additional noise mats around the light towers
- conduct our pre-construction meetings inside site offices
- ensure trucks' tailgates do not slam when unloading material
- advise our workers not to reverse into the compound where possible
- ensure that our workers keep all noise to a minimum as far as possible.

In addition, we have constructed a noise bund or 'wall' around our material pick up and drop off zone inside the compound to minimise noise from operational activity.
