

# Henry Lawson Drive Upgrade Stage 1A Project Update

March – May 2024

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW is upgrading Henry Lawson Drive, between Tower Road, Bankstown Aerodrome and Auld Avenue, Milperra.

## What work are we doing?

During standard work hours, the following work will occur:

- Roadwork and asphaltting throughout the alignment
- Storm water drainage works
- Utility works
- Pavement, kerb and gutter construction and resident access adjustments will begin near the intersection at Auld Avenue.

Our night work will include:

- Roadwork and pavement construction
- Installation of safety barriers
- Line marking and signage adjustments
- Storm water drainage crossings
- Storm water pit installation
- Asphaltting works

Our night work hours will be **up to five nights a week** from **8pm to 5am** the next day to minimise traffic disruptions during the day and reduce safety risks to workers and road users.

Traffic switches may occur on Friday nights due to road restrictions. When required, we will work up to five nights per week, weather permitting, and excluding public holidays.

We will contact those residents directly impacted by night works in advance.

## What will this mean for you?

We will be modifying traffic conditions to facilitate future construction work on Henry Lawson Drive and Milperra, Tower and Newbridge Roads.

Partial closure of the shared pedestrian and cycle path from the intersection of Henry Lawson Drive heading south to Auld Avenue will continue. Cyclists are still required to dismount due to narrow and changing pathway conditions as the pathway is reconstructed.

## When and where we'll be working

Our normal work hours will be between **7am and 6pm** from **Monday to Friday** and between **8am and 1pm** on Saturday. We will not work on Sundays and during public holidays.

You may notice increased activity in the area, including:

- Workers and vehicles
- Traffic controllers and signage
- Lane closures and reduced speed limits
- Footpath closures
- Pedestrian and cyclist detours
- Noise from machinery and equipment
- Temporary changes to traffic lane configurations across the project.

## Managing our impacts

We will make every effort to minimise impacts to the local community and motorists in the area by keeping noise to a minimum and directing lights away from residential areas, wherever possible.

For the latest traffic updates, call 132 701, visit [livetraffic.com](http://livetraffic.com) or download the Live Traffic NSW app.
