

Henry Lawson Drive – Stage 1B

Submissions Report is now available

March 2024

Transport for NSW acknowledges the Dharawal people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Review of Environmental Factors (REF) submissions report for the Henry Lawson Drive Upgrade – Stage 1B is now available.

Transport for NSW received 25 community submissions discussing topics such as design changes to parking spaces, lane widening, intersections, flood mitigation infrastructure and pedestrians crossings.

The revised proposal addresses the key concerns and challenges raised by the community and identified by Transport for NSW.

A key change since the REF consultation is modification of the shared path alignment and surface treatment to minimise tree removal.

We thank the community for your feedback and will continue to provide updates as the project progresses.
