

# Henry Lawson Drive Upgrade Stage 1B

September 2023

The NSW Government is upgrading Henry Lawson Drive to improve efficiency along the corridor and improve safety.

As part of the wider program to upgrade Henry Lawson Drive, Stage 1B will provide two lanes in each direction between Auld Avenue and the M5 Motorway. The Georges Hall upgrade, between Beale Street and just south of Rabaul Road, was completed earlier this year and the Stage 1A upgrade, between Tower Road and Auld Avenue, is currently under construction.

During June, July and August 2023, we asked the community for feedback on the early design features for Stage 1B.

To improve journey times, the project would introduce an additional right turn lane from Henry Lawson Drive to Bullecourt Avenue (totalling 2 right turn lanes) and an additional right turn lane from Bullecourt Avenue to Henry Lawson Drive (totalling 2 right turn lanes).

To do this we would need to reduce the amount of on-street parking by 11 spaces on the northern side of Bullecourt Avenue, between Henry Lawson Drive and Keysor Place.

We would like to invite your feedback and encourage you to provide us feedback about this part of the proposal so it can be included in the Review of Environmental Factors Submissions Report.

## Have Your Say

We invite you to provide feedback on the proposal by 29 September 2023, via:

**Email:** [henrylawsondrive@transport.nsw.gov.au](mailto:henrylawsondrive@transport.nsw.gov.au)

**Phone:** 1800 684 490

## Next Steps

Your feedback will be included in a submissions report which summarises feedback received on the Henry Lawson Drive Stage 1B project, along with our responses to each submission. The submissions report will be published on the project website.

We will keep community members and other stakeholders informed of the project, via website updates, community notifications and emails.
