

Jervis Bay Road intersection upgrade

Princes Highway upgrade program

Construction Update

June 2024

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Australian and NSW governments are delivering an upgrade to the Princes Highway and Jervis Bay Road intersection at Falls Creek.

What work are we doing?

During June, work will continue within the project area including:

- completing vegetation clearing
- installing/relocating safety barriers and signage
- utility, geotechnical and survey investigations
- removing existing fencing and installing new boundary fencing
- relocating existing utilities, including water, electrical and telecommunications
- building pavements on the Princes Highway, Jervis Bay Road and Old Princes Highway
- construction of a u-turn bay that can be used by the public
- importing material for the construction of embankments and other earthworks activities
- drainage works including cuts across existing roads.

When we'll be working

From **Saturday 1 June to Saturday 29 June 2024** (excluding the King's Birthday long weekend) our standard work hours will be Monday to Friday between 7am and 6pm, and on Saturdays between 8am and 1pm.

Where required, night work will be carried out in line with the Environment Protection Licence of up to 10 night shifts, and impacted residents will be notified directly. Night work hours will be between 6pm and 7am.

All work is subject to weather conditions. We will keep the community informed of any changes.

Temporary traffic changes

During work hours there will be some temporary traffic changes to ensure the work area is safe. Lane/shoulder closures and reduced speed limits of 40 km/h may be in place on the Princes Highway and Jervis Bay Road.

During night shift utility relocation work on the Princes Highway and Jervis Bay Road, there will be periods where one lane will be closed and vehicles will be directed under traffic control.

Barrier activities will move quickly along the alignment, and driveway access will not be impacted.

Motorists are advised to drive to conditions and follow the directions of signs and traffic control.

During night work, motorists should allow an extra five minutes' travel time.

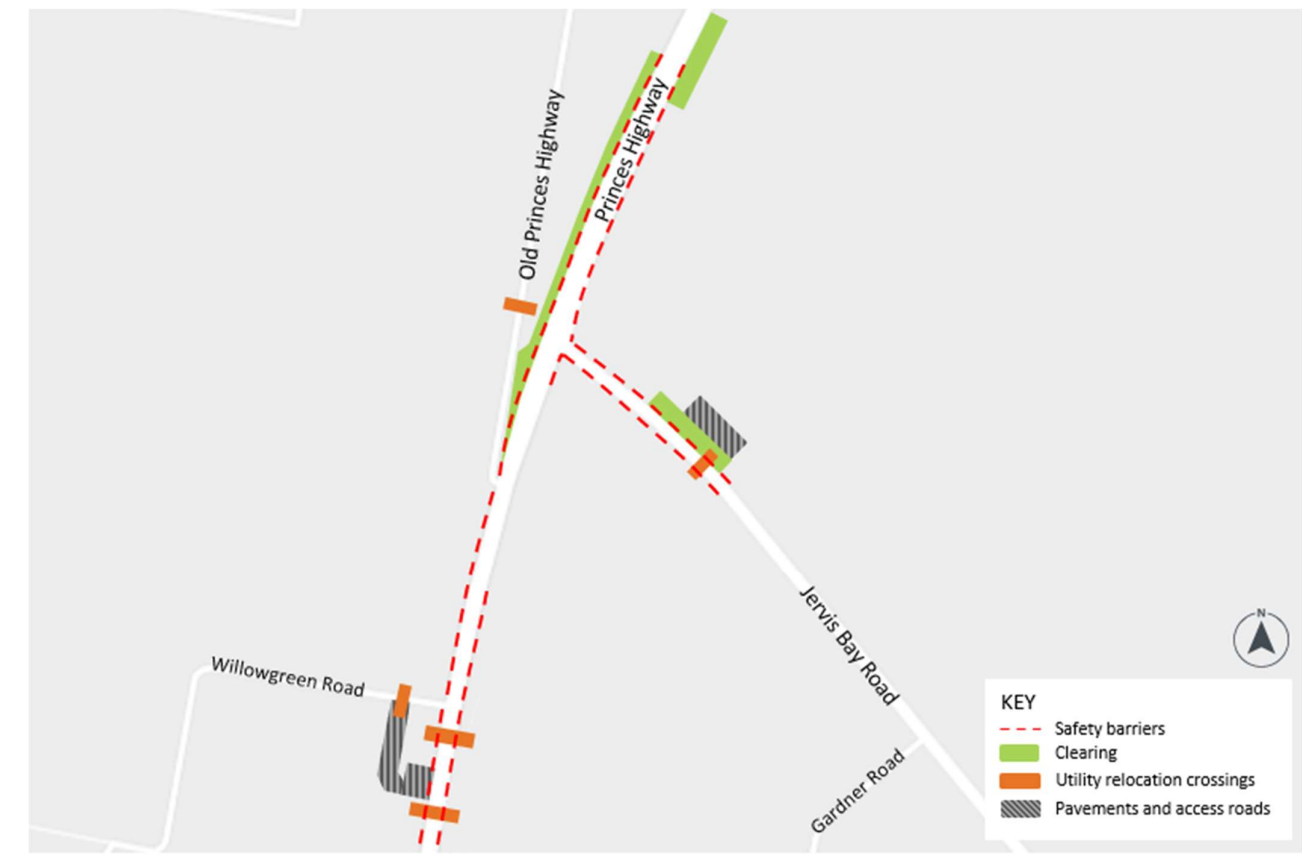

What will this mean for you?

Some activities need to be carried out at night to minimise traffic disruptions and reduce safety risks to our workers and road users.

We will not work more than two consecutive nights in the same area.

Our work may be noisy at times, however we will do everything we can to minimise these impacts including using non-tonal reversing beepers on equipment, turning machinery off when not in use and carrying out noisier works early during the night shift.

Location of work area

Contact us

For questions and enquiries please use the contact details below. The project does not have a community display centre, however we are happy to arrange face-to-face meetings on request.
