

Lawson Station Upgrade - investigation works from 3 July 2024

Safe Accessible Transport

June 2024

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Safe Accessible Transport program aims to make public transport safe, inclusive, and easy to use for all passengers, especially people with disability, older people, people with prams or luggage and others who may be experiencing mobility issues.

This program aims to achieve Disability Standards for Accessible Public Transport (DSAPT) compliance, improving amenity, access and safety and acknowledging the important role these locations have to the communities they serve.

Project status

Site surveys and utility searches have been completed.

Transport has engaged a designer to commence the initial concept design for the Lawson Station Upgrade. Transport will then consult the community and other key stakeholders for their feedback on the initial concept design.

To help inform the concept design, Transport will undertake geotechnical investigations at Lawson Station, including borehole work.

What work are we doing?

Geotechnical investigation work includes:

- establishing a temporary work site
- locating existing underground services
- using machinery to undertake geotechnical investigations

- taking soil samples for offsite testing
- backfill any testing locations
- a site clean-up once the work is completed.

When and where we'll be working

We'll be working within the Lawson Station precinct between **3 July and 16 July**.

Working hours are from **7am to 6pm, Monday to Friday** and **8am to 1pm on Saturdays**.

What will this mean for you?

The work will generate some noise. There may be temporary restrictions to up to six car spaces in the commuter car park during the works.

You may also notice:

- workers and vehicles in the station precinct
- traffic controllers and signage
- temporary footpath closures and pedestrian diversions
- noise from machinery and equipment.

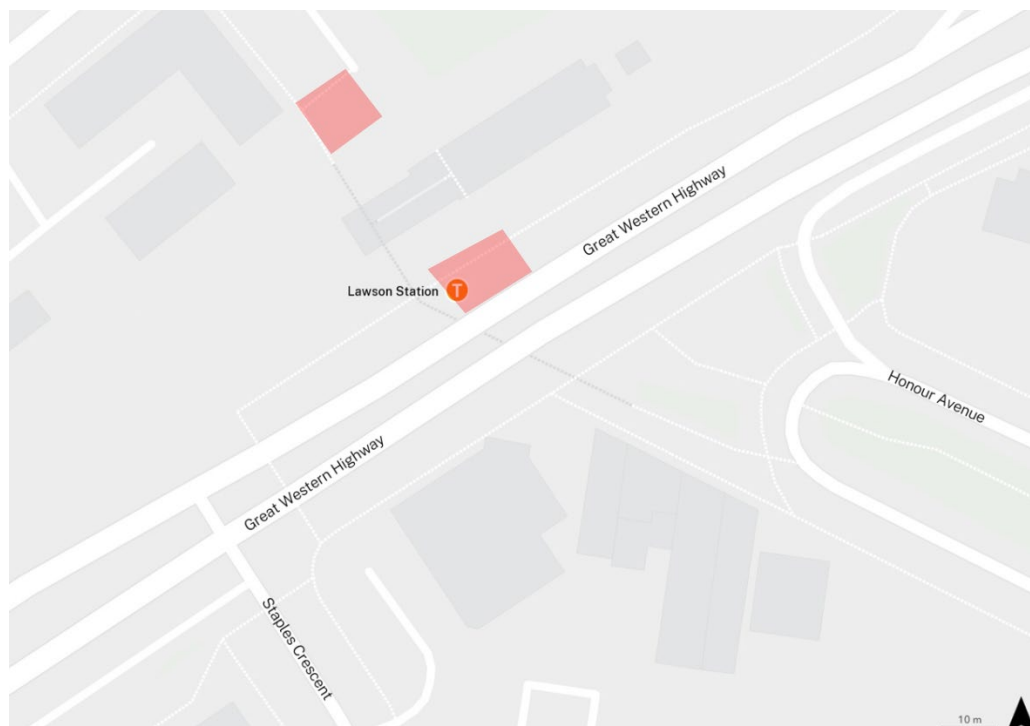

Managing our impacts

We aim to manage our work to avoid impacts to the community and environment. Site works have been managed to minimise impact and always ensure access to the Station during the work. Other measures to minimise our impacts include:

- fencing for safety and security
- pedestrian signage
- reducing our noise as much as possible
- traffic controllers to guide pedestrians.

Location of work area

Have your say at our Accessibility Workshops

We want to hear from people and carers with accessibility needs, about the design of the Lawson Station Upgrade.

We are holding online design workshops to better understand what barriers exist when using Lawson Station, and how we could better design the proposed improvements, to remove those barriers.

If you would like to participate in our online workshops, please register your interest via the QR code or online at

www.haveyoursay.nsw.gov.au/design-accessible-stations and we will be in contact with you to share all the important details.

There is also the option to request assistance should you need it to participate.
