

Macquarie Fields Station Upgrade Planning approval

Safe Accessible Transport program

November 2024

Transport for NSW acknowledges the Dharawal people of the Dharawal Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Transport for NSW (Transport) is upgrading Macquarie Fields Station to improve accessibility, amenity and safety.

In August-September 2024, Transport publicly displayed the Review of Environmental Factors (REF) for Macquarie Fields Station Upgrade, being delivered as part of the Safe Accessible Transport program.

We invited community and stakeholder feedback on plans to provide an accessible station with improved amenity and safety for customers.

Following public display of the REF and consultation, the proposed upgrade of Macquarie Fields station is now approved to proceed.

What we heard

Thank you for taking the time to provide feedback, we received a total of 79 submissions including one from Council and one from NSW State Emergency Service.

Key feedback included:

- Overall community support for the upgrade
- Retain existing parking numbers adjacent to the station specifically for commuters
- Increase the number of accessible kiss and ride and disability parking spaces

- More canopy coverage to maximise comfort and shelter
- Improved lighting and safer road crossing points for safety and security
- Improved design integration with the existing environment and some aesthetic tweaks
- Better location and more opal card readers and passenger information displays
- Future proofing the footbridge and considerations for retail space in future developments
- Better integration of services into the wider railway network.

Feedback received has been considered by the Project Team to help inform the design for the upgrade. Transport's response to feedback received is now available online in the Determination Report.

Feedback that related to items outside the scope of the proposal have been provided to the appropriate agency for consideration.

What's next?

A contract will soon be awarded for detailed design and construction of the station upgrade.

Transport will continue to keep the community and other stakeholders up to date as we work towards site establishment and start of early construction in late 2024, with main work expected in early 2025.
