Richmond Bridge investigation night work

Transport for NSW is preparing the concept design and environmental assessment for New Richmond Bridge and traffic improvements - Stage 2 project for public display in 2024.

What work are we doing?

Our investigation work is continuing and we will carry out inspection and coring work of Richmond Bridge on the Hawkesbury River.

During the visual inspection we will also carry out non-destructive testing of the bridge and checking the bridge structure for reinforcement, identifying defects in the concrete and assessing overall structural conditions.

The inspection will be along the entire length of the bridge. Our work will also involve concrete coring with a drill to extract three cores underneath the bridge.

Following the coring process, the holes will be filled with suitable materials to maintain structural integrity of the bridge. These concrete cores will then be laboratory tested to assess the composition and health of the bridge materials.

During the work we will use:

- concrete coring drill
- handheld testing tools
- generators
- tower lighting equipment.

When and where we'll be working

Our activities for the bridge investigation work will start from **Monday 5 February 2024** and continue until **Friday 16 February 2024**, weather permitting.

Our night shift hours would be between 9pm and 4am from Sunday to Thursday.

We will not work on public holidays.

How will the work affect you?

Our work needs to be carried out at night to minimise traffic disruptions and reduce safety risks to workers and motorists.

This work may be noisy at times but we will do everything we can to minimise its impact, including completing the noisier tasks earlier in the shift. Lighting will also be used during the work to ensure safety of the crew.

Traffic changes

While we will try minimising disruption to traffic, temporary traffic changes will be required at times to ensure the work zone is safe and reduced speed limits may be in place.

Please keep to the speed limits and follow the direction of traffic controllers and signs.

For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.

We thank you for your patience during this important work.
