

# Condobolin Road in Parkes to reopen from Wednesday 19 November

## Parkes Bypass Newell Highway upgrade

November 2024

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The Australian and NSW Governments are investing in the Parkes Bypass to improve connectivity, road transport efficiency and safety for all motorists.

### What work are we doing?

The four-way Condobolin Road roundabout is a significant feature of the Parkes Bypass, serving the essential function of facilitating convenient entry into the Parkes township.

**We will be reopening Condobolin Road to traffic on Wednesday 19 November** while we continue to work in the centre of the roundabout.

Access to the Bypass via the roundabout will not be possible until the Bypass opens in mid 2025.

### Traffic changes and night work

For the safety of motorists and workers, a number of traffic changes will be in place to allow this work to progress.

- **Condobolin Road between the roundabout and Hartigan Avenue** will be reduced to one lane, with stop slow conditions in place.
- **Ross Road will be closed off at Condobolin Road** and is expected to reopen in six weeks, weather permitting.
- **Moulden Street will be reopened** for local traffic access between Back Trundle Road and Condobolin Road. Heavy vehicle access to Parkes Landscaping will be via Moulden Street onto Back Trundle Road.

- Work will be carried out between **7am and 6pm** from **Monday to Friday** and **8am to 6pm** on **Saturdays**.
- **Night work** will take place on **Tuesday 18 November** between **6pm and 7am** to complete the line marking required to open the new roundabout.

**We have included a map to show the location of the changes.**

### Oversize Overmass movements

The Oversize Overmass (OSOM) route for vehicles wider than 4m will be via Thomas Street, Back Trundle, and Moulden Street.

### What will this mean for you?

- You may notice workers, traffic controllers and noise from machinery and equipment.
- Lane closures, intermittent stopping and reduced speed limits may be in place and may cause minor delays.

### Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment. This includes:

- using watercarts to suppress dust
- arranging the work in stages at different locations
- turning off machinery and vehicles when not in use
- variable messaging signs in place.

## Changed traffic conditions near Condobolin Road roundabout

We thank you for your patience during this important work.
