

Sydney Terminal Area Reconfiguration - Central Station

May 2024

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

This program is designed to simplify and modernise the rail network. Passengers will be able to access more services on a simpler and more reliable network through the delivery of better infrastructure, new trains and extra services.

Work at Central Station will ensure new trains on the South Coast Line can access platforms 1 to 14. Other upgrades between Sydney Terminal and Erskineville Junction will allow for more frequent services in the future.

What work are we doing?

In May 2024, we will be undertaking the following:

- removing redundant cable and installing cabling routes
- drainage work
- track and signalling reconfiguration
- partial platform removal and reinstatement
- installing and commissioning overhead wiring infrastructure
- service investigations
- platform modification work.

When and where we'll be working

In May 2024, work will take place inside our site compounds and the rail corridor as shown in the map overleaf.

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Out of hours work and deliveries

Some work and deliveries are required to take place outside of standard construction hours between:

- **6pm Friday 17 May and 7am Monday 20 May 2024**
- **6pm Friday 24 May and 7am Monday 27 May 2024.**

Some minor midweek signalling work will take place outside of standard construction hours within the rail corridor. This work is not expected to be noticeable.

Why we work outside of standard construction hours

We schedule work outside of standard construction hours to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles, including crane trucks and excavators
- lighting from temporary lighting towers
- noise from machinery and equipment, including rock breaking and piling equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts

- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
