

Sydney Terminal Area Reconfiguration - Erskineville

May 2024

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The More Trains, More Services program is simplifying and modernising the rail network creating high capacity, turn up and go services for many customers.

Work at Erskineville will involve installation of a hi-rail pad and associated infrastructure to facilitate maintenance access and enhance operation efficiency.

What work are we doing?

In May 2024, we will be undertaking the following:

- rail track installation and adjustment
- underground conduit installation
- drainage installation
- signalling work.

When and where we'll be working

In May 2024, work will take place inside the rail corridor at Erskineville, adjacent to the Macdonaldtown Stabling Yard.

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Out of hours work and deliveries

Some work will take place outside of standard construction hours between **7am Saturday 4 May and 11pm Sunday 5 May 2024.**

Why we work outside of standard construction hours

We schedule work outside of standard construction hours to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- noise from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts
- locating equipment as far away from residents and businesses as possible
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
