

# Survey works Garfield Road East, Riverstone

August 2024

Transport for NSW acknowledges Dharug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The NSW Government has committed \$100 million to progress the planning of the Garfield Road East upgrade between Piccadilly Street, Riverstone and Windsor Road, Grantham Farm.

The Garfield Road East upgrade is proceeding into detailed design and preparations for the construction of the Garfield Road East project, which will improve safety, traffic flow, and access for pedestrians, cyclists, and public transport users.

Transport for NSW will carry out survey work along Garfield Road East from George Street, Riverstone to Alan Street, Box Hill.

## What work are we doing?

A detailed survey is required to accurately map existing utilities, structures and physical features of Garfield Road East.

These surveys will help inform the design of future road upgrades for Garfield Road East.

## When and where we will be working

The work along the Garfield Road East verge, which is the area between the road and the boundary of a property, will take place over **20 shifts** between **Friday 16 August** and **30 September 2024**.

Our work hours are **7am to 6pm, Monday to Friday** and **7am to 1pm, Saturday**.

Please see the map on the next page for the location of the survey work.

## Access to private property

Access may be required to some private properties along Garfield Road East. Letters and consent forms will be sent to the legal owners of the properties. The consent forms will include:

- Any conditions of entry to the property
- Preferred method of contact with the property owner
- Any restrictions on entry to specific areas of the property
- How much notice is required before the team enters the site.

Field investigation teams will always carry identification. Property owners or tenants have the right to ask to see this identification. If tenants are on the property, owners should agree with the tenant on the date and time of access.

## How will the work affect you?

The survey work will be carried out within the road reserve, the area between property boundaries made up of road, verges, cycle lanes and footpaths, or on private property along the road corridors.

We will maintain access to properties and businesses at all times. If we need to access your property, we will contact you in advance to discuss access arrangements.
