

July community update

Tuggerah Station Upgrade

June 2024

Transport for NSW acknowledges the Darkinjung people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The NSW Government is improving accessibility at Tuggerah Station

Transport for NSW is upgrading Tuggerah Station. The upgrade will provide a train station that is safe, inclusive and easy to use for all passengers - especially people with disability, older people, people with prams or luggage and others who might be experiencing mobility problems.

What we are doing in July 2024?

Work includes:

- general construction works, including delivery and removal of plant and materials
- adjustments to hoarding and fencing to facilitate construction works
- formwork, reinforcement and concrete pours, including concrete pours to make the new walkways
- crane movements to assist with construction
- earthwork activities including waste classification and removal of waste materials
- installation of utility connections for the station
- demolition and excavation work and associated truck movements for import and export of materials
- continued installation of structural steel and other building materials.

We will use various equipment, including cranes, excavators, jack hammers, trucks including tipper, flat tray track and Hiab, elevated work platform, concrete trucks and concrete pumps, powered and manual hand tools.

Drivers will continue to see construction vehicle movements and traffic control on Pacific Highway and Anzac Road.

During July, there will be continued temporary changes to car parking arrangements at Tuggerah Station to allow for construction work, this will include changes to accessible parking. Signage is in place with further details.

When we'll be working

Standard construction hours are **7am to 6pm Monday to Saturday**. We will notify nearby residents and businesses in advance if we need to work outside these times.

Out of hours

We are extending our construction hours during the month of July in preparation for upcoming works in August. During this time, we will work **7am to 6pm, every Sunday in July**.

Work involves digging trenches in preparation for essential electrical commissioning work that is planned to take place the following weekend.

This work will be undertaken on the weekend when the station is quieter for less community disruption, however it will generate some noise and inconvenience in the Bryant Drive commuter carpark area.

Work will include delivery and installation of structural steel for the new station structure and drainage installation in the Kiss & Ride area. Tools being used will include cranes, concrete trucks, heavy plant, and powered hand tools.

Changes to Kiss & Ride

From mid-July there will be reduced parking at the Kiss & Ride drop off area for two weeks to

facilitate drainage installation, deliveries and construction work Bryant Drive side.

Managing our impacts

A traffic control team will be available to assist with any impacts to pedestrian movements.

This work may be noisy; however, we aim to avoid impacts to the community and the environment where possible by:

- fencing off areas for the safety of commuters
- using noise blankets and turning off machinery and equipment when not in use.

Thank you for your patience as we carry out this important work.

The station upgrade is progressing nicely, with the new lift shaft and stairs now completed. Lift car and rails will soon be delivered for installation.
