Tuggerah Station Upgrade

April 2024

Transport for NSW acknowledges the Darkinjung people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The NSW Government is improving accessibility at Tuggerah Station

Transport for NSW is upgrading Tuggerah Station. The upgrade will provide a train station that is safe, inclusive and easy to use for all passengers - especially people with disability, older people, people with prams or luggage and others who might be experiencing mobility problems.

What we are doing in April 2024?

Work includes:

- building and waterproofing the new lift shafts
- general construction works, including delivery and removal of plant and materials
- surveying and site investigations
- adjustments to hoarding and fencing to facilitate construction works
- formwork, reinforcement and concrete pours
- crane movements to assist with construction
- earthwork activities including waste classification and removal of waste materials
- relocation of lights, cameras and signs on both platforms
- completion of new structural supports under Platform 1
- installation of utility connections for the station
- demolition and excavation works and associated truck movements for import and export of materials.

Drivers will continue to see construction vehicle movements and traffic control on Pacific Highway and Anzac Road.

During April, there will be continued temporary changes to car parking arrangements at Tuggerah Station to allow for construction work, this will include changes to accessible parking. Signage will be in place with further details.

When we'll be working

Standard construction hours are **7am to 6pm Monday to Saturday**. We will notify nearby residents and businesses in advance if we need to work outside these times.

Out of hours

From **10pm Friday 5 April to 7am Monday 8 April 2024**, additional plant movements will occur throughout the commuter car park during a planned Sydney Trains trackwork weekend when the station is closed and trains will not be running. Work will include delivery and installation of structural steel for the new station structure and the use of cranes, concrete trucks and heavy plant and powered hand tools.

Changes to parking in the Bryant Drive commuter carpark

We will be temporarily relocating seven parking spots and six accessible parking spots from of the commuter car park on Bryant Drive **intermittently until Tuesday 30 April 2024**.

Additional accessible parking spots are available in the council car park on Bryant Drive. Signage is in place to direct drivers.

The area will be utilised as a lay down area for structural steel that will be pre-assembled prior to being lifted into final position.

Schedules and work are subject to change due to permits, weather and site conditions.

What will this mean for you?

We will use various equipment, including cranes, excavators, jack hammers, trucks including tipper, flat tray track and hiab, elevated work platform, concrete trucks and concrete pumps, powered and manual hand tools.

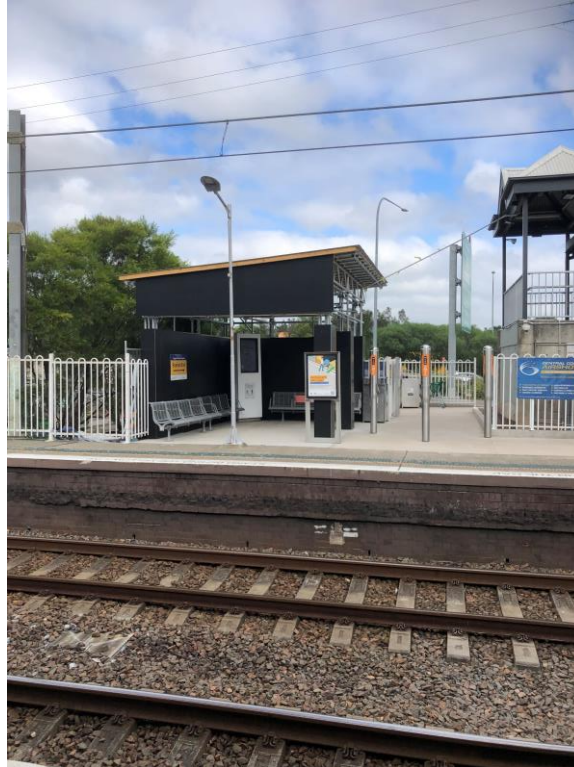

Managing our impacts

A traffic control team will be available to assist with any impacts to pedestrian movements.

This work may be noisy, however we aim to avoid impacts to the community and the environment where possible by:

- fencing off areas for the safety of commuters
- using noise blankets and turning off machinery and equipment when not in use.

Thank you for your patience as we carry out this important work.

New seating installed on Platform 2.
